The Shanghai Commercial & Savings Bank

Regulatory disclosures about the capital adequacy as requested by the competent authority

- 1) Capital management:
 - (1) Scope of application [Table 1]
 - (2) Capital adequacy ratio [Table 2&3]
 - (3) Capital Structure [Table 4, 4-1, 4-2, 4-3, 5]
 - (4) Leverage ratio Table 6&6-1
- 2) Overview of risk management and RWA:
 - (1) Bank risk management approach [Table 7]
 - (2) Key metrics [Table 8]
 - (3) Overview of RWA [Table 9&9-1]
- 3) Linkages between financial statements and regulatory exposures:
 - (1) Differences between accounting and regulatory scopes of financial statements with regulatory risk categories 【Table 10】
 - (2) Main sources of differences between regulatory exposure amounts and carrying values in financial statements 【Table 11】
 - (3) Explanations of differences between accounting and regulatory exposure amounts [Table 12]
- 4) Credit risk:
 - (1) General information about credit risk 【Table 13】
 - (2) Qualitative disclosures Credit risk [Table 14-17]
 - (3) Qualitative disclosures Credit risk standardised approach [Table 18]
 - (4) Qualitative disclosures Credit risk standardised approach [Table 19&20]
 - (5) Qualitative disclosures Counterparty credit risk Table 27
 - (6) Quantitative disclosures Counterparty credit risk [Table 28-35]
- 5) Operational risk:
 - (1) Qualitative disclosures Operational risk [Table 36]
 - (2) Quantitative disclosures Operational risk Table 37
- 6) Market Risk:
 - (1) Qualitative disclosures Market Risk [Table 38&39]
 - (2) Quantitative disclosures Market Risk Table 40-43
- 7) Securitisation:
 - (1) Qualitative disclosures Securitisation [Table 44]
 - (2) Quantitative disclosures Securitisation [Table 45-48]
- 8) Interest Rate Risk in the Banking Book Management 【Table 49】
- 9) Liquidity risk:
 - (1) Liquidity risk management [Table 50]
 - (2) Liquidity Coverage Ratio (LCR) Table 51
 - (3) NSFR [Table 52]
- 10) Remuneration policy:
 - (1) Qualitative disclosures Remuneration [Table 53]
 - (2) Quantitative disclosures Remuneration。 【Table 54-56】
- 11 Macroprudential supervisory measures:
 - (1) Countercyclical capital buffer 【Table 57】

Description of capital adequacy management 2023

Items	Contents
A summary discussion of the bank	Manage and monitor according to the "Capital
's approach to assessing the	Adequacy Management Guidelines" of SCSB.
adequacy of its capital to support	
current and future activities.	2. Standardize specific business, such as business
46	type, commitment amount, rating, etc. Before
	proceeding, the Risk Management Department should
2,5	be informed of the capital adequacy assessment.
	3. Under the premise of assessing capital adequacy, set the business objectives of the medium and long-term strategic planning. The capital adequacy assessment process and stress testing are performed annually.
	4. The forecast of capital adequacy and the use of capital analysis by various business units are reported to the Asset and Liability Management Committee.
	5. According to the "Market Risk Management Policy" of SCSB, ensure that market-weighted risk assets are capped at no more than 15% of SCSB's weighted risk assets and are reported to the Asset and Liability Management Committee for periodic review.

Bank risk management approach 2023

Items	2023 Content
1.How the business model determines and interacts with the overall risk profile and how the risk profile of the bank interacts with the risk tolerance approved by the board.	SCSB classifies its main risks as credit risk, market risk, operational risk, liquidity risk, bank interest rate risk and sovereign risk. Each business unit plans business and risk allocation in correspondence with risk tolerance set by the Board. To assure business exposures in line with SCSB's risk limits, SCSB's risk management units monitor and report risk profiles to President of SCSB and the Board on a regularly basis.
2.The risk governance structure	The board of directors is the final decision-making unit in SCSB's risk management structure, and takes ultimately responsibility for SCSB's overall risk management. To strengthen risk management, SCSB has organized the Risk Management Committee for counseling with the Board. To ensure independence, Auditing Department is organized under the Board that performing audits independently from business units and CEO. There are the Assets and Liabilities Management Committee, the Credit Review Committee and the Investment Review Committee under the President for managing SCSB's assets and liabilities, credit risk management and investment risk management respectively; Also, to strengthen operation controlling, there are operation centers that handle credit checks, estimates, credit reviews, drawdown, settlements, and check clearings imports and exports documents.
3.Channels to communicate, decline and enforce the risk culture within the bank	SCSB's bank-wide risk management policy is approved by the Board of Directors. The president is responsible for executing strategies and policy concerning business plan and risk policy which is set by the Board. Under the president, there are Risk Management Department and risk management managers of business units who are responsible for daily risk management monitoring and reporting to the top management committee timely and on a regularly basis.
4.The scope and main features of risk measurement systems.	Risk-related systems deployed on the mainframes are credit checking system, KONDOR PLUS system, the MGR system, and the Ulsteck bond trading system which are maintained by designated business units. The operation centers are entrusted by the business units to provide credit assessments and estimates. Credit reports filed by branches are sent to the operation centers for review, which are then approved and signed online. This system has improved efficiency and helped built a more comprehensive credit database. The KONDOR PLUS system, MGR system and Ulsteck bond trading system are outsourced software systems, which provide real-time control and daily valuation. The results are then transmitted to SCSB's EDW system for the risk management units to perform required measurement and control of credit risks.
5.Description of the process of risk information reporting provided to the board and senior management, in particular the scope and main content of reporting on risk exposure.	The Risk Management Department has to report risk information together with material risk issues to the the Board of Directors quarterly. For more timely managing of risk, the Risk Management Department reports to top managements and related committees at least but not limit to every month.
6.Qualitative information on stress testing (eg portfolios subject to stress testing, scenarios adopted and methodologies used, and use of stress testing in risk management).	The scope of stress testing covers from credit risk, market risk, operational risk, banking book interest rate risk, liquidity risk, SCSB's large exposure to concentration risk and risk is interested as well. Testing scenario is decided according to the current business exposures and overall macro economics while testing methodology complies with guidelines of SCSB's stress testing set by government supervisor, also.
7.The strategies and processes to manage, hedge and mitigate risks that arise from the bank's business model and the processes for monitoring the continuing effectiveness of hedges and mitigants.	In order to decrease credit risks, loan purpose and repayment of clients are required along with credit review. Moreover, use of collaterals or credit guarantee funds is set forth in the credit policies of Corporate and Personal Banking Departments as the further risk reduction tools. Document reviews or on-site inspections of loan purpose and business condition are conducted on a regular basis to ensure clients prepayment capacity. To enhance SCSB's credit spread pricing, the Corporate and Personal Banking Departments use a credit rating system to price loan interest rate. SCSB also regulate credit limitation, as applied to a single counterparty or group, industry, sovereign t, to avoid excessive risk concentration. As for reducing market risk, the predefined market risk tolerances are monitored on daily basis. In addition, all sophisticated securities investment has to be approved by top managements before placing out. As a whole, Management Department of SCSB has to monitor and report risk to top managements on daily basis, which keep senior management's well informed on the SCSB's risk profile timely.

Table 12 Explanations of differences between accounting and regulatory exposure 2023

	Items	Contents
1	Explanation of the differences between accounting accounting and regulatory scopes of financial statements, as displayed in Table	The difference between financial assets deposited with the central bank and interbank borrowings and measured at fair value through profit or loss is due to book value adjustments that are included in the scope of statutory capital deductions, less internal transactions. The difference between receivables is that the book value of the
	10.	acceptance receivable in the financial statements is on-balance sheet assets, but the carrying values under scope of regulatory is attributed to off-balance sheet assets.
2	Explanation of the differences between regulatory exposure amounts and carrying values in	1. credit risk: the differences between regulatory exposure amounts and carrying values in financial statements is due to off-balance sheet differences.
	financial statements, as displayed in templates Table 11.	2. counterparty credit risk and market risk: the differences between regulatory exposure amounts and carrying values in financial statements is affected by capital charge methods.
3	Explanation of valuation methodologies, independent price verifications and valuation adjustments, or procedure preparation under the market risk framework.	When marking-to-market is not possible, the bank may use self-developed models or pricing calculators provided by financial data vendor (such as Bloomberg or Reuters) to price instruments. Risk management department conducts the pricing model validation: 1. Fundamental validation: Verifying the model documentation, assumptions, theories, and parameters. The bank may only verify the mathematics and the parameters if the model is widely adopted. 2. Validation and testing of marking-to-model results: Validation can be conducted by comparing marking-to-model results with which valued by a similar model, a self-developed model, a widely used model or quoted from a firm. It also can be validated by comparison with sensitivity analysis and stress testing. 3. Post-validation: Risk management department should provide the documentation to Asset Liability Management Committee for resolution. Clarify the uncertainty of marking-to-model results if necessary. The bank may also conduct valuation adjustments (including provision for reserves and asset impairment) in a prudent way. Reasons for adjusting the valuation when investing or trading are credit losses, early terminations, large and concentrated positions or less liquid positions.

General qualitative information about credit risk 2023

		2023
	How the business model translates into the components of the bank's credit risk profile	Contents Corporate banking remained the core business. SCSB also made continued effort to upgrade the rest of business units, they are: foreign exchange business, Cross-Strait Banking, SME finance, Personal Banking and Wealth Management.
1	of the bank's credit risk profile	Based on the risk strategy, risk appetite and business profit targets approved by the Board of Directors, the Bank established appropriate credit risk management policies, formulated various business credit risk management regulations, such as risk pricing and limits, and strengthened risk dispersion principles to effectively reduce concentration risks., and pre-transaction risk management and measurement, regular review after the transaction and asset quality monitoring, etc., to determine the management basis of each product business or
	Criteria and approach used for defining credit risk management policy and for setting credit risk limits	SCSB has developed a credit risk management policy in accordance with the Banking Law and applicable regulations, and the SCSB Risk Management Policy. SCSB conducts businesses in credit, investment and financial derivatives in strict compliance with the Banking Act and applicable laws and regulations, and in alignment with government policies for economic and financial development, while balancing security, liquidity, profitability, growth and
2		public benefits. Strategy for credit risk management seeks risk diversification, prudent evaluation based on the 5P principles, and a right balance between risk and return. The risk management process grants credit authorization to heads of business units and regional centers. Pursuant to the Banking Act and SCSB credit risk management policies, individual customers, groups, industries, and countries (regions) are subject to credit limits in order for the Bank to avoid excessive risk
3	Structure and organisation of the credit risk management and control function	concentration. SCSB's risk management is led by the Board of Directors, with the Risk Management Committee overseeing risk management across SCSB. The Assets and Liabilities Management Committee reports to the President and is responsible for managing SCSB's assets and liabilities, while an independent Risk Management Department is responsible for establishing and implementing a Bank-wide risk management mechanism. Each unit has set up dedicated risk management teams, according to its size, importance and complexity, for implementing risk management. In addition, there are the Credit Review Committee and the Investment Review Committee under the President responsible for credit risk management and investment risk management respectively; and the operation centers that handle credit checks, estimates, credit reviews, drawdowns, settlements, and check clearings. Foreign exchange is handled by the foreign exchange division of branches where each operation center is located.
4	Relationships between the credit risk management, risk control, compliance and internal audit functions	A comprehensive system of internal auditing and self-checking has been established, and compliance officers are appointed. Work guidelines are in place for routine operations, and all transactions are monitored by computer systems. The compliance department and the compliance officer of all departments and operating units should be responsible for enhancing awareness of compliance. The internal audit checks the compliance and implementation of the nuclear credit risk specification and is directly responsible to the board of directors. Regularly check and evaluate the integrity and actual implementation of various risk management mechanisms, and provide improvement suggestions in a timely manner to ensure the sustainable and effective implementation of various risk management mechanisms.
5	Scope and main content of the reporting on credit risk exposure and on the credit risk management function to the executive management and to the board of directors	SCSB has set up a Risk Management Department to monitor reports and integrate Bank-wide risk management .A Board - level Risk Management Committee is set up to oversee risk controls and the Risk Management Department reports Bank-wide risk status regularly to the Board of Directors. The report contains information on national, industry, group, single customer, liquidity and other business risks. Establish a clear notification procedure, each transaction has a limit and stop loss provisions, if the transaction reaches the stop loss limit should be executed immediately; if the stop loss is not implemented, the transaction unit should indicate the non-stop reason and response plan, report to the higher management level Approved and reported to the Committee on Accountability on a regular basis.
6	Core features of policies and processes for, and an indication of the extent to which the bank makes use of, on-and off-balance sheet netting.	When the following requirements are met, the Bank can reduce the credit risk by offsetting the in-table liabilities to the table: 1. Have a sound legal basis: ensure that the net settlement or write-off agreement is in the jurisdiction, and whether there is no counterparty The solvency is both mandatory; 2. It can determine that all assets and liabilities of the same counterparty have been included in the bank's net settlement contract; 3. There are appropriate control measures for significant risks on a net basis.
7	Core features of policies and processes for collateral evaluation and management.	The Bank has adopted a number of policies and measures to reduce credit risk for credit business. One of the main methods is to require borrowers to provide collateral. The collateral provided by the borrower shall be subject to compliance, independence, reliability, and realizable value to ensure the creditor's rights of the Bank. The Bank shall determine the conditions of the collateral and the procedures for the valuation, management and disposal of the collateral to ensure the creditor's rights of the Bank. The collateral of other non-credit business is determined by the nature of the financial instrument. Only asset-based securities and other similar financial instruments are secured by a group of asset instruments.
8	Information about market or credit risk concentrations under the credit risk mitigation instruments used (ie by guarantor type, collateral and credit derivative providers).	1. In order to mitigate credit risks, checks on the client's credit, use of funds and ability for loan repayment are required before every credit transaction. Additionally, the use of collaterals or credit guarantee funds as risk reduction tools is set forth in the credit policies of Corporate and Personal Banking Departments. Document reviews or on-site inspections are conducted on a regular basis regarding clients' use of funds, operations, finances, and repayment ability to ensure the claims. 2. In order to strengthen SCSB's credit risk control, the Corporate and Personal Banking Departments use a credit rating system to aid their credit decision-making and loan interest rate setting. This helps increase credit quality and makes credit pricing more objective and reasonable. 3. Pursuant to the Banking Act and SCSB credit risk management policies, individual customers, groups, industries, and countries (regions) are subject to credit limits in order for the Bank to avoid excessive risk concentration.

【Table 16】

Additional disclosure related to the credit quality of assets 2023

	Items	Contents
1	The scope and definitions of "past due" and "impaired" exposures used for accounting purposes and the differences, if any, between the definition of past due and default for accounting and regulatory purposes.	The impaired and default definitions for accounting and regulatory purposes refer to those loans for which the principal or interest has been in arrears for three months or more, and those loans which the principal or interest has not yet been in arrears for more than three months, but with regard to which the bank has sought payment from primary/subordinate debtors or has disposed of collateral.
2	The extent of past-due exposures (more than 90 days) that are not considered to be impaired and the reasons for this.	definitions used for regulations of capital adequacy. The exposures that overdue more than 90 days are impaired.
3	Description of methods used for determining impairments.	Objective evidence of impairment for a portfolio of loans and receivables could include the Group's past experience with collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period, as well as observable changes in national or local economic conditions that correlate with defaults on such financial assets.
4	The bank's own definition of a restructured exposure.

[Table 27]

Qualitative disclosure related to counterparty credit risk 2023

		2023
	Items	Contents
Ris	k management objectives and po	licies related to counterparty credit risk, including:
1	The method used to assign the operating limits defined in terms of internal capital for counterparty credit exposures and for CCP exposures;	The bank sets the counterparty limit based on the credit risk policy. The credit risk limit is based on the credit quality of the counterparty and the risk appetite of the Bank for the potential future risk of the transaction. (ex: 95% confidence interval)
2	Policies relating to guarantees and other risk mitigants and assessments concerning counterparty risk, including exposures towards CCPs	Policies of credit risk hedging or mitigation a. Collateral The Bank applies series of policies to decrease credit risks in its lending business. Among those policies is to request collateral from borrowers. To secure the creditor's rights, the Bank has established procedures for pledges, valuations, management, and disposals of collateral. The contracts between the Bank and the borrowers clearly state the protocols, including but not limited to the security of credit, procedures for collateral and for offsets. To further decrease credit risks, the contracts also proclaim that the Bank may decrease the credit facilities at its discretion, accelerate the maturity of the borrowings, demand immediate payback, or offset borrowers' assets in the Bank against the borrowings. b. Limitation of credit risk and credit concentration management The credit policies of the Bank regulate the credit limitations, as applied to a single counterparty or group, to avoid excessive credit concentration. The Bank further implements concentration policies, which monitor and manage the credit limitation and concentration in one single counterparty, different enterprises, related parties, industries, and countries. The policies are based on individual criteria in different categories including but not limited to industries, enterprises, and share-pledge related loans. c. Other mechanisms for credit risk management The contracts between the Bank and the borrowers clearly state the protocols, including but not limited to the security of the credit, procedures for collateral and setoff. To further decrease credit risks, the contracts also proclaim that the Bank may decrease the balances, shorten the maturity period, demand immediate payback, or use borrowers' assets in the Bank to offset their liabilities. In most circumstances, the Bank applies gross settlement with counterparties. However, to further decrease credit risks, the
3	Policies with respect to wrong-	Bank applies net settlement or even terminates transactions with certain counterparties when default may occur. The Bank doesn't formulate the policy of Wrong Way Risk.
	way risk exposures	, , , , , , ,
4	The impact in terms of the amount of collateral that the bank would be required to provide given a credit rating downgrade.	The Bank is based on a contract with a counterparty. When the Bank's credit rating is lowered, the amount of the collateral is required.

Operational risk 2023

	2023
Items	Contents
	For the management of operational risks, SCSB makes a division of duties to
Operational Risk Management	strengthen internal control and carry out training programs for business and regulatory
	awareness. A comprehensive system of internal auditing and self-checking has been
	established, and compliance officers are appointed. Work guidelines are in place for
	routine operations, and all transactions are monitored by computer systems. The Risk
	Management Department is also developing tools for operational risk management to
	enable more efficient and effective identification, assessment, monitoring and reporting
	of major risks.
2.Organization and Structure of	Operational risk management applies to all units of SCSB, including the business units,
Operational Risk Management	operational management units, and supporting logistical units.
	Board of Directors: the highest managing and supervisory body.
	Risk Management Committee: reviewing issues and activities related to risk
	management.
	President: establishing risk management procedures approved by the Board of
	Directors.
	Auditing Department: responsible for regular inspections of the effectiveness of
	operational risk management.
	Compliance Department and Compliance Officers of all departments and operating
	units: responsible for strengthening awareness of regulatory compliance.
	Risk Management Department: increasing awareness of the framework of operational
	risk management.
	All units and personnel of SCSB: following and implementing the Bank's policies for
	operational risk management.
	7
3.Scope and Features of	Any major risk exposures identified that can jeopardize SCSB's finances or normal
Operational Risk Report and	operation, or the financial market in general must be reported to the audit units
Evaluation System	promptly, and to the regulators if deemed necessary, so that actions may be taken in
Evaluation System	
	response. Violations of the law have to be reported by the Compliance Officer to
	Compliance Department. The Risk Management Department makes regular
	disclosures on SCSB's operational risks, risk information and other major issues, and
	reports to the senior management, the Assets and Liabilities Management Committee,
	the Strategic Planning Committee, the Risk Management Committee, and the Board of
	Directors. SCSB is developing a control and self-evaluation system for major
	operational risks and setting up compliance officers and self-audit/self-check

[Table 38]

Qualitative disclosure requirements related to market risk - standardised approach
2023

	Items	Contents
1	Strategies and processes for market risk of the bank	Strategy for market risk management seeks risk diversification and prudent evaluation, with a focus on balancing risk versus return. SCSB has put in place market risk management policies, guidelines for authorization, guidelines for risk management of financial derivatives and investments, and operational procedures for various financial products, which set forth allowed investments, internal controls and risk management measures. Management of market risks is monitored by the responsible units of defense of first-line and second-line based on the approved transactions or investment limits and loss tolerance for financial instruments and trading units set by the Board of Directors. Underlying exposures and profits/losses are reported by the nature of the products on a regular basis. Any overrun, exception or major event has to be reported immediately to the heads of responsible units, who will decide on a response if needed.
2	Structure and organisation of the market risk management function	SCSB's risk management is led by the Board of Directors, under which the Audit Committee is responsible for reviewing major events and procedures for derivative transactions. The purpose of the Risk Management Committee is to oversee risk management policies and strategies, risk management assessment, and risk management mechanisms for novel businesses. The Assets and Liabilities Management Committee reports to the President and is responsible for reviewing Bank-wide market risk limits and procedures, while the Investment Review Committee reviews and approves SCSB's investment in securities. The independent Risk Management Department is responsible for establishing and implementing a Bank-wide risk management mechanism.
3	Scope and nature of risk reporting and/or measurement systems	Market-related risks are managed with the securities system, EDW system, KPMG financial products assessment system (including the Treasury Plus evaluation engine), KONDOR PLUS system, MGR system, and the Ulsteck ticket/bond trading system deployed on the mainframes. This analysis provides the necessary information to the Risk Management Department for timely control of trading and investment positions, daily evaluations, and other necessary management.

[Table 49]

Interest Rate Risk in the Banking Book Management System 2023

Items	Content
Interest Rate Risk in the Banking Book Management Strategies and Procedures.	SCSB has established "Interest Rate Risk Management Standards" which include in setting interest rate risk management indicators, defining the responsibilities of related units, and establishing a mechanism for identifying, measuring, monitoring and reporting interest rate risk. The standard's establishment and amendment have been approved by the board of directors.
2.Organization and	The Board of Directors is the highest decision-making unit for SCSB's
Framework of Interest Rate	interest rate risk management in the banking book.
Risk in the Banking Book Management.	The supervision unit of SCSB's interest rate risk is the Asset and Liability Management Committee, the management unit is the Risk Management Department, and the execution unit is each business department and each business unit.
	The Asset and Liability Management Committee will hold regular monthly review meetings to enable the responsible units to understand the implementation of the interest rate risk in the banking book management, and promoted to the heads of various departments through the ALCO members.
3.Scope and Characteristics	To manage the bank's IRRBB, SCSB uses risk measurement methods
of Interest Rate Risk in the Banking Book Reporting and Measurement	such as gap analysis, earnings-based and economic value measures to evaluate the impact on SCSB's future earnings and current capital from adverse movements in interest rates on its banking book. In order to allow senior management and the Board of Directors understand the interest rate risk of the banking book as a reference for decision-making, the Risk Management Department regularly monitors various interest rate risk-related indicators, and reports the results to the Asset and Liability Committee monthly, to the Risk Management Committee and the Board of Directors quarterly.
4.Interest Rate Risk in the	Interest rate risk in the banking book management is based on gap
Banking Book Hedging or Mitigation Policy, and Strategies and Procedures for Monitoring the Continuing	analysis. If there are special products and/or activities those significantly affect SCSB's banking book interest rate risk such as issuing fixed-rate financial bonds and undertaking large-scale fixed-rate loans, it will be assessed on a case-by-case basis.
Effectiveness of Hedging and Mitigation Instruments.	SCSB considers all on-balance sheet items in the gap analysis, sets interest rate risk limits and regularly monitors them; if the limit is exceeded, the relevant units will report to the Asset and Liability Management Committee for review and the appropriate measures should be taken in a manner.

[Table 50]

Liquidity risk management 2023

Items	Contents
1.Strategies and Procedures	According to the SCSB's liquidity risk management guidelines, the liquidity
for Liquidity Risk	risk measurement indicators and the assessment of liquidity risk support
Management	capabilities, the establishment of monitoring, periodic assessment and
92-1-1-1-1-1-1-1-1-1-1-1-1-1-1-1-1-1-1-1	immediate reporting mechanisms, and the establishment of the liquidity
	crisis, SCSB's contingency plan With the relevant units, the appropriate
	measures should be taken in a timely manner.
2.Organization and Structure	The Board of Directors is the highest decision-making unit for liquidity risk
of Liquidity Risk Management	management of SCSB, and the Asset and Liability Management
4500	Committee reviews and evaluates issues related to liquidity risk
	management. It usually meets once a month and reports management
	situation and related recommendations to Risk Management Committee
	and the Board of Directors on a quarterly basis; Department of Risk
	Management is the monitoring and reporting unit of various liquidity risk
	indicators, and the Financial Department is the executive unit that controls
	the liquidity of the day and the fund scheduling.
3.Scope and Features of	To manage liquidity risk,SCSB establishes a management mechanism for
Liquidity Risk Report and	various liquidity risk indicator limits. The risk management unit regularly
Evaluation System	monitors whether indicators such as deposit reserve, current ratio, deposit
	ratio, and liquidity limit comply with regulations and implementation stress
	tests. And report the results to Risk Management Committee and the
	Board of Directors for reference.
4.Funding strategy, including	SCSB's funding strategy is to adopt centralized management, planned by
policies on diversification in	the Treasury Department, and reported to the Assets and Liabilities
the sources and tenor of	Management Committee for decision-making; in addition to maintaining
funding, and whether the	diversified and stable funding sources, SCSB strives to diversify funding
funding strategy is	sources and time periods, and has established various liquidity
centralised or decentralised.	management indicators in terms of asset-liability structure and
	concentration, which are controlled by the Treasury Department.

Items	Contents
5.Hedging or Mitigation	To properly control the rapid management of the risk, SCSB has
Policies for Liquidity Risk;	established a liquidity risk limit management mechanism, set limits on
Strategies and Procedures	various management indicators and regularly monitor them; If the limit is
for Assessing the	exceeded, the relevant units will report to the Asset and Liability
Effectiveness of Hedging or	Management Committee for review and implementation after responding t
Mitigation	the countermeasures. In the event of a major liquidity crisis caused by an
	emergency,SCSB will adopt appropriate measures following SCSB's
	emergency response plan to ensure the normal operation of SCSB.
6.An explanation of how	SCSB conducts a liquidity risk stress test every quarter. The execution
stress testing is used.	procedures are as follows:
stress testing is used.	. At the beginning of each year, based on the results of identifying potential
	sources of liquidity risks, and determining the scope of the stress test and
	designing the stress scenario, submitted to the Asset and Liability
	Management Committee for approval.
	For each stress situation, regularly estimate the cash flow and
	The state of the s
	accumulated funding gap of each balance sheet and off-balance sheet
	items.
	. If there is a gap, SCSB will evaluate the capital scheduling tools that car
	be used to make up the negative capital gap, such as the realization of
	financial assets.
	. After the stress test result report is produced, it is provided to the Asset
	and Liability Committee and the Risk Management Committee to take
	necessary measures to control the risk profile within the risk appetite.
7.An outline of the bank's	When the liquidity of funds is in crisis, the Treasury Department should
contingency funding plans.	immediately report to the level of Executive Vice President or above, and
	the Asset and Liability Management Committee should urgently discuss
	the principles and measures for crisis management, as well as the need t
	adjust the asset and liability structure, and formulate a comprehensive
	communication plan to stabilize the confidence of depositors, interbanks,
	and counterparties.
	SCSB's emergency response plan is as follows:
	1. Borrow from interbanks.
	2. Sell short-term bills, government bonds, financial bonds, and
	(convertible) corporate bonds.
	3. Adjust the advertised interest rate and issuing negotiable certificates of
	deposit.
	4. Issue subordinated financial bonds.
	5. Sale listed and OTC stocks、beneficiary certificates.
	6. Stop loan business and/or sell syndicated loans assets.
	7. Rediscount or refinancing with the central bank.
	8. Other feasible contingency measures.

Remuneration policy

2023

(A)	nformation relating to the bodies that oversee rer	nuneration.
1	Name, composition and mandate of the main body overseeing remuneration	The remuneration committee Duties: 1. Prescribe and periodically review the performance review and remuneration policy, system, standards, and structure for directors and managerial officers. 2. Periodically evaluate and prescribe the remuneration of directors and managerial officers. 3. Other matters to be discussed by the board of directors.
2	External consultants whose advice has been sought, the body by which they were commissioned	
	and in what areas of the remuneration process.	None
3	A description of the scope of the bank's remuneration policy (eg by regions, business lines), including the extent to which it is applicable to foreign branches.	Taiwan
	A description of the types of employees	Δ
4	Senior management	President, (First) Executive Vice President
	Other material risk-takers	(First) Deputy Executive Vice President

(B)	Information relating to the design and structure of	f remuneration processes
1	An overview of the key features and objectives of remuneration policy.	Establish a remuneration policy that combines external market competitiveness and internal fairness to attract, motivate and retain outstanding talents. Cultivate a performance-oriented corporate culture, and implement the bank's business strategy objectives.
2	Whether the remuneration committee reviewed the firm's remuneration policy during the past year, and if so, an overview of any changes that were made, the reasons for those changes and their impact on remuneration.	Meetings of the remuneration committee shall be held at least 2 times a year. In the past year, the remuneration policy was revised, Executive Vice President and above must continue to hold the Bank's stock within 3 years from the day they assumed the post for not less than 300,000 shares - 1,000,000 shares in principle.
3	A discussion of how the bank ensures that risk and compliance employees are remunerated independently of the businesses they oversee	None

(C)Description of the ways in which current and future risks are taken into account in the remuneration processes.				
processes. Disclosures should include an overview	The metrics of sales performance appraisal includes non-financial indicators, and its incentive bonus needs to be withheld 20~30% as deferred bonus.			

	(D)Description of the ways in which the bank seeks to link performance during a performance measurement period with levels of remuneration.				
1	An overview of main performance metrics for bank, top-level business lines and individuals.	The performance metrics of the bank and individuals are finance, business process, customer service, internal control and learning/growth. As to sales, the metrics are finance, customer service, internal control and learning/growth.			
2	A discussion of how amounts of individual remuneration are linked to bank-wide and individual performance.	Performance pay is based on compensating the employee per individual contribution as well as achieving target. The units with higher earnings target, individuals with higher responsibilities and excellent performance appraisal results can obtain higher incentive bonuses.			
3	A discussion of the measures the bank will in general implement to adjust remuneration in the event that performance metrics are weak, including the bank's criteria for determining "weak" performance metrics.	The incentive bonus is linked to the individuals' performance. When the performance metrics are weak, their incentive bonus will reflect accordingly.			

(E)Description of the ways in which the bank seeks to adjust remuneration to take account of longer-term					
performance.					
1	A discussion of the bank's policy on deferral and vesting of variable remuneration and, if the fraction of variable remuneration that is deferred differs across employees or groups of employees, a description of the factors that determine the fraction and their relative importance.	The incentive bonus are withheld 20~30% as deferred bonus, and the proportion of deferred bonus is based on the results of non-financial indicators.			
2	A discussion of the bank's policy and criteria for adjusting deferred remuneration before vesting and (if permitted by national law) after vesting through clawback arrangements.	The assessment metrics of the deferred bonus is not part of the vested condition.			

П	(F)Description of the different forms of variable remuneration that the bank utilises and the rationale for using these different forms.					
	1	An overview of the forms of variable remuneration offered (ie cash, shares and share-linked instruments and other forms).	There are no different forms of variable remuneration.			
	2	A discussion of the use of the different forms of variable remuneration and, if the mix of different forms of variable remuneration differs across employees or groups of employees), a description the factors that determine the mix and their relative importance.	There are no different forms of variable remuneration.			

(G)Additional information
