INDEPENDENT AUDITORS' REPORT

The Board of Directors and Shareholders The Shanghai Commercial & Savings Bank, Ltd. Taipei, Taiwan

Opinion

We have audited the accompanying consolidated financial statements of The Shanghai Commercial & Savings Bank, Ltd. (the "Bank") and its subsidiaries (collectively referred to as the "Group"), which comprise the consolidated balance sheets as of December 31, 2022 and 2021, and the consolidated statements of comprehensive income, changes in equity and cash flows for the year ended December 31, 2022 and 2021, and the notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2022 and 2021, its consolidated financial performance and its consolidated cash flows for the year ended December 31, 2022 and 2021 in accordance with the Regulations Governing the Preparation of Financial Reports by Public Banks and International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), and SIC interpretations (SIC) endorsed and issued into effect by the Financial Supervisory Commission of Taiwan.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and auditing standards in Taiwan. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with The Norm of Professional Ethics for Certified Public Accountant of Taiwan, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the year ended December 31, 2022. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matters related to the Group's consolidated financial statements as of and for the year ended December 31, 2022 are described as follows:

Allowance for Impairment Losses of Discounts and Loans

The Group primarily engages in the loan business. As of December 31, 2022, the loan business is significant to the accompanying consolidated financial statements. The Bank conducted its impairment assessment of discounts and loans and recognized allowance for bad debts according to the requirements of IFRS 9 and the authorities' regulations. The Bank's management assessed the impairment of discounts and loans by using the expected credit loss model. The Group assesses whether the credit risk has increased significantly since initial recognition by taking into consideration factors like the amount of loss on impairment, past experience, current market situation and prospective information, etc. In addition, credit-impaired loans are also evaluated for possible future recovery. Refer to Notes 4, 5, 14 and 40 to the consolidated financial statements for disclosures related to impairment of loan portfolios. As the cash flow forecasts involved management's critical judgments in accounting estimation and the underlying assumptions, we then determined the impairment of loan portfolios as a key audit matter.

In response to the abovementioned key audit matter, the following procedures were performed:

- 1. We understood and tested the Group's internal control procedures that were relevant to the assessment of loan impairment.
- 2. We verified that the method and important parameters adopted in the expected credit loss model had properly reflected actual situations and calculated the amount of impairment loss.
- 3. We tested the classification of credit assets and confirmed that the allowance for loss met the requirements of the competent authorities' regulations.

Other Matter

We have also audited the parent company only financial statements of the Bank as of and for the year ended December 31, 2022 and 2021 on which we have issued an unmodified opinion.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS, IAS, SIC endorsed and issued into effect by the FSC, and for such internal control as management determines is necessary to ensure the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the audit committee, are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards in Taiwan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the auditing standards in Taiwan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- 1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- 3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- 5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6. Obtain sufficient and appropriate audit evidence regarding the financial information of entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision, and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements for the year ended December 31, 2022 and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audits resulting in this independent auditors' report are Chun-Hung Chen and Shih-Tsung Wu.

Deloitte & Touche Taipei, Taiwan

February 24, 2023

Notice to Readers

The accompanying consolidated financial statements are intended only to present the consolidated financial position, financial performance and cash flows in accordance with accounting principles and practices generally accepted in Taiwan and not those of any other jurisdictions. The standards, procedures and practices to audit such consolidated financial statements are those generally applied in Taiwan.

For the convenience of readers, the independent auditors' report and the accompanying consolidated financial statements have been translated into English from the original Chinese version prepared and used in Taiwan. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language independent auditors' review report and consolidated financial statements shall prevail.

(Concluded)

1. ORGANIZATION AND OPERATIONS

The Shanghai Commercial & Savings Bank(the "Bank") is incorporated in Taiwan and engages in the commercial banking businesses under related laws and regulations. The shares of the Bank have been traded on Taiwan Stock Exchange since October 19, 2018.

The Bank has its head office in Taipei and 76 branches, including 4 foreign branches separately located in Wuxi China, Hong Kong, Vietnam Dong Nai and Singapore.

The consolidated financial statements are presented in the Bank's functional currency, the New Taiwan dollar.

2. AUTHORIZATION OF CONSOLIDATED FINANCIAL STATEMENTS

On February 24, 2023, the consolidated financial statements were approved by the board of directors and issued afterward.

3. APPLICATION OF NEW, AMENDED AND REVISED STANDARDS AND INTERPRETATIONS

3.1 Initial application of the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) (collectively, the "IFRSs") endorsed and issued into effect by the Financial Supervisory Commission (FSC).

The Group assessed that the initial applicable amendments to the IFRSs approved and issued by the FSC will not result in significant changes to the Bank's accounting policies.

3.2 New IFRSs endorsed by the FSC to be applied in 2023

New IFRSs	Effective Date Announced by IASB
Amendments to IAS 1 "Disclosure of Accounting Policies"	January 1, 2023 (Note1)
Amendments to IAS 8 "Definition of Accounting Estimates"	January 1, 2023 (Note 2)
Amendments to IAS 12 "Deferred Tax related to Assets and Liabilities arising from a Single Transaction"	January 1, 2023 (Note 3)

- Note 1: This amendment will be applied to annual reporting periods beginning on or after January 1, 2023.
- Note 2: This amendment will be applied to changes in accounting estimates and accounting policies on or after the annual reporting period beginning on January 1, 2023.
- Note 3: Except for deferred taxes that were recognized on January 1, 2022 for temporary differences associated with leases and decommissioning obligations, the amendments were applied prospectively to transactions that occurred on or after January 1, 2022.

As of the date the consolidated financial statements were authorized for issue, the Group is continuously assessing the possible impact of the application of other standards and interpretations on the Group's financial position and financial performance and will disclose the relevant impact when the assessment is completed.

J.J INCW II INDS III ISSUE U		d and issued into effect by the FSC

New IFRSs	Effective Date <u>Announced by IASB (Note 1)</u>
Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets between An Investor and Its Associate or Joint Venture"	To be determined by IASB
Amendments to IFRS 16 "Leases Liability in a Sale and Leaseback"	January 1, 2024 (Note 2)
IFRS 17 "Insurance Contracts"	January 1, 2023
Amendments to IFRS 17	January 1, 2023
Amendments to IFRS 17 "Initial Application of IFRS 9 and IFRS 17 - Comparative Information"	January 1, 2023
Amendments to IAS 1 "Classification of Liabilities as Current or Non-current"	January 1, 2024
Amendments to IAS 1 "Non-current Liabilities with Covenants"	January 1, 2024

- Note 1 : Unless stated otherwise, the above IFRSs are effective for annual reporting periods beginning on or after their respective effective dates.
- Note 2 : A seller-lessee shall apply the Amendments to IFRS 16 retrospectively to sale and leaseback transactions entered into after the date of initial application of IFRS 16.

As of the date the consolidated financial statements were authorized for issue, the Group is continuously assessing the possible impact of the application of other standards and interpretations on the Group's financial position and financial performance and will disclose the relevant impact when the assessment is completed.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

4.1 Statement of Compliance

The consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Public Banks and IFRSs as endorsed and issued into effect by the FSC.

4.2 Basis of Preparation

The consolidated financial statements have been prepared on the historical cost basis except for financial instruments which are measured at fair value.

The fair value measurements are grouped into Levels 1 to 3 based on the degree to which the fair value measurement inputs are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- 4.2.1 Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities;
- 4.2.2 Level 2 inputs are observable parameters other than quoted prices included within Level 1, either directly (i.e. as prices) or indirectly (i.e. derived from prices);
- 4.2.3 Level 3 inputs are unobservable inputs for an asset or liability.

4.3 Classification of Current and Non-current Assets and Liabilities

Since the operating cycle in the banking industry cannot be reasonably identified, accounts included in the Group's consolidated financial statements are not classified as current or non-current. Nevertheless, these accounts are properly categorized according to the nature of each account and sequenced by

liquidity.

4.4 Basis of Consolidation

The consolidated financial statements contain the financial statements of the Bank and the subsidiaries controlled by the Bank. The consolidated statements of comprehensive income have included the operating gains and losses of acquired or divested companies in the current period from the date of acquisition or to the date of disposal. The financial statements of subsidiaries have been adjusted to align their accounting policies with the Bank's accounting policies. In the preparation of the consolidated financial statements, all intra-group transactions, account balances, income and losses have been eliminated. The comprehensive income of the subsidiaries is attributed to the owner of the Bank and non-controlling interests, even if the non-controlling interests have negative balance.

For details on subsidiaries, shareholding ratios and business items, refer to Note 15 and Table 5.

4.5 Business Combinations

Acquisitions of businesses are accounted for using the acquisition method. Acquisition-related costs are generally recognized in profit or loss as incurred.

Goodwill is measured as the excess of the sum of the consideration transferred and the fair value of the acquirer's previously held equity interest in the acquiree over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed.

4.6 Foreign Currencies

In preparing the financial statements of each individual entity in the Group, transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions.

At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Exchange differences on monetary items arising from settlement or translation are recognized in profit or loss in the period in which they arise.

Non-monetary items measured at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Exchange differences arising on the retranslation of non-monetary items are included in profit or loss for the period except for exchange differences arising from the retranslation of non-monetary items in respect of which gains and losses are recognized directly in other comprehensive income, in which case, the exchange differences are also recognized directly in other comprehensive income.

Non-monetary items that are measured at historical cost in a foreign currency are not retranslated.

For the purposes of presenting consolidated financial statements, the assets and liabilities of the Group's foreign operations (including of the associates or branches in other countries or currencies used are different from the currency of the Bank) are translated into New Taiwan dollars using exchange rates prevailing at the end of each reporting period. Income and expense items are translated at the average exchange rates for the period. Exchange differences arising are recognized in other comprehensive income (attributed to the owners of the Bank and non-controlling interests as appropriate).

4.7 Financial Instruments

Financial assets and financial liabilities are recognized in the consolidated balance sheets when the Group becomes one of the parties of the contract.

For financial assets and financial liabilities other than financial assets or financial liabilities at fair value through profit or loss (FVTPL), the fair value is directly attributable to the transaction costs of acquiring

or issuing financial assets or financial liabilities. Transaction costs directly attributable to the acquisition or issue of financial assets or financial liabilities at FVTPL are recognized as current expenses.

4.7.1 Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

(1) Measurement

The Group owns financial assets which are classified into the following specified categories: Financial assets at FVTPL, financial assets at amortized cost, investments in debt instruments at fair value through other comprehensive income (FVTOCI) and investments in equity instruments at FVTOCI.

A. Financial assets at FVTPL

A financial asset is classified as at FVTPL when the financial asset is mandatorily classified as at FVTPL. Financial assets mandatorily classified as at FVTPL include investments in equity instruments which are not designated as at FVTOCI and debt instruments that do not meet the amortized cost criteria or the FVTOCI criteria.

Financial assets at FVTPL are subsequently measured at fair value, with any gains or losses arising on re-measurement (excluding any dividends or interest arising from such financial assets) recognized in profit or loss. Fair value is determined in the manner described in Note 40.

B. Financial assets at amortized cost

Financial assets that meet the following conditions are subsequently measured at amortized cost:

- a. The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- b. The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Subsequent to initial recognition, financial assets at amortized cost, including cash and cash equivalents, accounts receivable at amortized cost and others, are measured at amortized cost, which equals to gross carrying amount determined using the effective interest method less any impairment loss. Exchange differences are recognized in profit or loss.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for:

- a. Purchased or originated credit-impaired financial assets, for which interest income is calculated by applying the credit-adjusted effective interest rate to the amortized cost of such a financial asset; and
- b. Financial assets that have subsequently become credit-impaired, for which interest income is calculated by applying the effective interest rate to the amortized cost of such a financial asset.

Cash equivalents include accounts due from the Central Bank that are highly liquid, convertible into fixed cash at any time, and have a low-risk of value changes within three months from the date of acquisition, which are used to meet short-term cash commitments.

C. Investments in debt instruments at FVTOCI

Debt instruments that meet the following conditions are subsequently measured at FVTOCI:

- a. The financial asset is held within a business model whose objective is achieved by both the collecting of contractual cash flows and the selling of the financial assets; and
- b. The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Investments in debt instruments at FVTOCI are subsequently measured at fair value. Changes in the carrying amounts of these debt instruments relating to changes in foreign currency exchange rates, interest income calculated using the effective interest method and impairment losses or reversals are recognized in profit or loss. Other changes in the carrying amount of these debt instruments are recognized in other comprehensive income and will be reclassified to profit or loss when the investment is disposed of.

D. Investments in equity instruments at FVTOCI

On initial recognition, the Group may make an irrevocable election to designate investments in equity instruments as at FVTOCI. Designation at FVTOCI is not permitted if the equity investment is held for trading or if it is contingent consideration recognized by an acquirer in a business combination.

Investments in equity instruments at FVTOCI are subsequently measured at fair value with gains and losses arising from changes in fair value recognized in other comprehensive income and accumulated in other equity. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments; instead, they will be transferred to retained earnings.

Dividends on these investments in equity instruments are recognized in profit or loss when the Group's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment.

(2) Impairment of financial assets

The Group recognizes a loss allowance for expected credit losses on financial assets at amortized cost (including discounts and loans and accounts receivable), investments in debt instruments that are measured at FVTOCI, lease receivables, loan commitments, as well as contract assets at the estimated credit loss on each balance sheet date.

For such financial assets, the Group recognizes lifetime expected credit losses (ECLs) when there has been a significant increase in credit risk since initial recognition. If, on the other hand, the credit risk on a financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12-month ECLs.

Expected credit losses reflect the weighted average of credit losses with the respective risks of default occurring as the weights. Lifetime ECLs represent the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECLs represent the portion of lifetime ECLs that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

The Group recognizes an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account, except for investments in debt instruments that are measured at FVTOCI, for which the loss allowance is recognized in other comprehensive income and does not reduce the carrying amount of such a financial asset.

Under the guidelines of the "Regulations Governing the Procedures for Banking Institutions to

Evaluate Assets and Deal with Non-performing/Non-accrual Loans" issued by the Banking Bureau of the Financial Supervisory Commission, the credit accounts are categorized into five groups: Normal credit assets, assets that require special mention, substandard assets, doubtful assets and full-amount loss based on clients' financial conditions. After assessing the value of the collateral, the Group will assess the possibilities of recovery.

Under the above guidelines, in addition to the minimum standard allowance for all accounts, allowance is provided for accounts classified as normal (except government accounts), accounts with notice, accounts with warning, difficult accounts and uncollectible accounts at rates of 1%, 2%, 10%, 50%, and 100%, respectively.

According to the local statutes, the Bank's allowances for bad debts and guarantee liabilities for the "acquisition of residential home repair loans and construction loans" and "category one credit assets (including short-term trade financing) due from PRC businesses" should be at least 1.5%. In addition, the minimum allowance for bad debts for SME loans handled in accordance with the "Regulations for the Central Bank's Handling of Bank Acceptance of SME Loans Affected by the Severe Special Contagious Pneumonia Epidemic" is 0.5%.

Debts that are determined to be uncollectible are written off after being reported to the board of directors for approval.

(3) Derecognition of financial assets

When the contractual rights from the cash flows of financial assets have lapsed or the financial assets and all the risks and rewards of the assets have been transferred to other enterprises, the financial assets are derecognized.

When a financial asset is totally derecognized, the difference between the carrying amount and the sum of any accumulated gain or loss recognized in other comprehensive income is recognized as profit or loss.

On derecognition of a financial asset at amortized cost in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss. On derecognition of an investment in a debt instrument at FVTOCI, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss which had been recognized in other comprehensive income is recognized in profit or loss. However, on derecognition of an investment in an equity instrument at FVTOCI, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss, amount and the sum of the consideration received and receivable is recognized in profit or loss, and the cumulative gain or loss which had been recognized in other comprehensive income is transferred directly to retained earnings, without recycling through profit or loss.

On derecognition of a financial asset other than in its entirety, the Group allocates the previous carrying amount of the financial asset between the part it continues to recognize and the part it no longer recognizes on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognized and the sum of the consideration received for the part that is no longer recognized is treated in the same way as when the financial asset is derecognized in entirety. A cumulative gain or loss that had been recognized in other comprehensive income is allocated between the part that continues to be recognized and the part that is no longer recognized on the basis of the relative fair values of those parts.

4.7.2 Equity instruments

Debt and equity instruments issued by the Group are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments issued by the Group are recognized at the proceeds received, net of direct issue costs.

The repurchase of the Group's own equity instruments is recognized in and deducted directly from equity. No gain or loss is recognized in profit or loss on the purchase, sale, issuance or cancellation of the Group's own equity instruments.

- 4.7.3 Financial liabilities
 - (1) Subsequent measurement

All financial liabilities are measured at amortized cost using effective interest rate, except for the following situations:

A. Financial liabilities at FVTPL

Financial liabilities are classified as at FVTPL when such financial liabilities are either held for trading or designated as at FVTPL.

Financial liabilities held for trading are stated at fair value, with any gain or loss arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss does not incorporate any interest or dividends paid on such financial liability.

A financial liability may be designated as at FVTPL upon initial recognition when doing so results in more relevant information and if:

- a. Such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- b. The financial liability forms part of a group of financial assets or financial liabilities or both, which is managed and has performance evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- c. The contract contains one or more embedded derivatives so that the entire combined contract (asset or liability) can be designated as at FVTPL.

For a financial liability designated as at FVTPL, the amount of changes in fair value attributable to changes in the credit risk of the liability is presented in other comprehensive income and will not be subsequently reclassified to profit or loss. The remaining amount of changes in the fair value of that liability which does not incorporate any interest or dividends paid on such financial liability is presented in profit or loss. The gain or loss accumulated in other comprehensive income will be transferred to retained earnings when the financial liability is derecognized. If this accounting treatment related to credit risk would create or enlarge an accounting mismatch, all changes in the fair value of the liability are presented in profit or loss.

Fair value is determined in the manner described in Note 40.

B. Financial guarantee contracts

The financial guarantee contracts issued by the Group and not measured at FVTPL are measured at the higher of the allowance for the expected credit losses and the amortized amount after initial recognition.

(2) Derecognition of financial liabilities

The difference between the carrying amount of a financial liability derecognized and the consideration paid and payable is recognized in profit or loss.

4.7.4 Derivatives

Derivatives signed by the Group include forward foreign exchange contracts, interest rate swaps and others to manage the Group's interest rate and exchange rate risk.

Derivatives are initially recognized at fair value at the date on which the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately unless the derivative is designated and effective as a hedging instrument; in which event, the timing of the recognition in profit or loss depends on the nature of the hedging relationship. When the fair value of a derivative financial instrument is positive, the derivative is recognized as a financial asset; when the fair value of a derivative financial instrument is negative, the derivative is recognized as a financial liability.

Derivatives embedded in hybrid contracts that contain financial asset hosts that are within the scope of IFRS 9 "Financial Instruments" are not separated; instead, the classification is determined in accordance with the entire hybrid contract. Derivatives embedded in non-derivative host contracts that are not financial assets that is within the scope of IFRS 9 (e.g. those embedded in the principal contract of financial liabilities) are treated as separate derivatives when they meet the definition of a derivative; their risks and characteristics are not closely related to those of the host contracts; and the host contracts are not measured at FVTPL.

4.8 Investment in Associates

An associate is an entity over which the Group has significant influence and that is neither a subsidiary nor an interest in a joint venture.

The Group applies equity method to account for investments in associates.

The results and assets and liabilities of associates are incorporated in these consolidated financial statements using the equity method of accounting. Under the equity method, an investment in an associate is initially recognized at cost and adjusted thereafter to recognize the Group's share of the profit or loss and other comprehensive income of the associate. The Group also recognizes the changes in the Group's share of equity of associates attributable to the Group.

Any excess of the cost of acquisition over the Group's share of the net fair value of the identifiable assets and liabilities of an associate recognized at the date of acquisition is recognized as goodwill, which is included within the carrying amount of the investment and is not amortized. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of acquisition, after reassessment, is recognized immediately in profit or loss.

When the Group subscribes for additional new shares of the associate at a percentage different from its existing ownership percentage, the resulting carrying amount of the investment differs from the amount of the Group's proportionate interest in the associate. The Group records such a difference as an adjustment to investments with the corresponding amount charged or credited to capital surplus. If the Group's ownership interest is reduced due to the additional subscription of the new shares of associate, the proportionate amount of the gains or losses previously recognized in other comprehensive income in relation to that associate is reclassified to profit or loss on the same basis as would be required if the investee had directly disposed of the related assets or liabilities. When the adjustment should be debited to capital surplus, but the capital surplus recognized from investments accounted for by the equity method is insufficient, the shortage is debited to retained earnings.

When the Group's share of losses of an associate equals or exceeds its interest in that associate, including any carrying amount of the investment accounted for by the equity method and long-term interests that, in substance, form part of the Group's net investment in the associate, the Group

discontinues recognizing its share of further losses. Additional losses and liabilities are recognized only to the extent that the Group has incurred legal obligations or constructive obligations, or made payments on behalf of that associate.

The entire carrying amount of the investment (including goodwill) is tested for impairment as a single asset by comparing its recoverable amount with its carrying amount. Any impairment loss recognized is deducted from investment and the carrying amount of investment is net of impairment loss. Any reversal of that impairment loss is recognized to the extent that the recoverable amount of the investment subsequently increases.

4.9 Non-performing Loans

Under the guidelines of "Regulations Governing the Procedures for Banking Institutions to Evaluate Assets and Deal with Non-performing/Non-accrual Loans", the balance of loans and other credits extended by the Bank and the related accrued interest thereon are classified as non-performing.

Non-performing loans in the lending business are classified as discounts and loans; otherwise, are classified as other financial assets.

4.10 Securities Purchased/Sold Under Resale/Repurchase Agreements

Securities purchased under resale agreements and securities sold under repurchase agreements are generally treated as collateralized financing transactions. Interest earned on resale agreements or interest incurred on repurchase agreements is recognized as interest income or interest expense over the life of each agreement.

4.11 Properties and Equipment

Properties and equipment are stated at cost, less recognized accumulated depreciation.

Depreciation is provided on a straight-line basis over estimated useful lives and the critical components are identified and depreciated separately. Depreciation expense of the land and buildings held by SCB (HK) is depreciated using the straight-line method over the useful lives under 40 years. Other equipment is computed using the straight-line method within the durability of 4 to 10 years. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period by the Group. Change in accounting estimates takes effect retrospectively.

Any gain or loss on the disposal or retirement of an item of property and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in profit or loss.

4.12 Investment Properties

Investment properties are properties held to earn rentals and/or for capital appreciation. Investment properties also include land held for a currently undetermined future use.

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are measured at cost less accumulated depreciation. Depreciation is recognized using the straight-line method.

Any gain or loss on the disposal or retirement of an item of investment property is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in profit or loss.

4.13 Goodwill

Goodwill arising from the acquisition of a business is measured at cost as established at the date of acquisition of the business less accumulated impairment loss.

For the purposes of impairment testing, goodwill is allocated to each of the Group's cash-generating units or groups of cash-generating units (referred to as "cash-generating units") that is expected to benefit from the synergies of the combination.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually or more frequently when there is an indication that the unit may be impaired, by comparing its carrying amount, including the attributed goodwill, with its recoverable amount. However, if the goodwill allocated to a cash-generating unit was acquired in a business combination during the current annual period, that unit shall be tested for impairment before the end of the current annual period. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then pro rata to the other assets of the unit based on the carrying amount of each asset in the unit. Any impairment loss is recognized directly in profit or loss. Any impairment loss recognized for goodwill is not reversed in subsequent periods.

4.14 Intangible Assets

4.14.1 Acquisition as separate asset

Intangible assets that have finite useful lives and are acquired separately are carried at cost less accumulated amortization. Amortization is recognized on a straight-line basis over their estimated useful lives. The estimated useful lives, residual value, and amortization method are reviewed at the end of each reporting period. The residual value of an intangible asset with a finite useful life is assumed to be zero unless the Group expects to dispose of the intangible asset before the end of its economic life. Change in accounting estimate takes effect prospectively.

4.14.2 Acquisition by business combination

The intangible assets acquired from business combination are recognized at the fair value on the acquisition date and are recognized separately from goodwill. Subsequent measurement is the same as intangible assets acquired separately.

4.15.3 Derecognition

Any gain or loss on the disposal or retirement of an item of intangible assets is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in profit or loss.

4.15 Impairment of Property and Equipment, Right-of-Use Assets, Intangible Assets Other Than Goodwill

At the end of each reporting period, the Group reviews the carrying amounts of its property and equipment, right-of-use assets and intangible assets, excluding goodwill, to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs to sell and value in use. If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount.

When an impairment loss is subsequently reversed, the carrying amount of the asset or cash-generating unit is increased to the revised estimate of its recoverable amount, but only to the extent of the carrying amount that would have been determined had no impairment loss been recognized on the asset or cash-generating unit in prior years. A reversal of an impairment loss is

recognized immediately in profit or loss.

4.16 Collaterals Assumed

Collaterals assumed are recorded at their appraised values. At balance sheet date, these collaterals are individually revalued at the lower of cost or net realizable value.

4.17 Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

4.18 Revenue Recognition

Interest revenue from loans is estimated on accrual basis. Interest revenue from non-performing Bank-extended loans and other credits are recognized only when collection is made. In accordance with the Ministry of Finance regulations, the interest from the relief and extension of specific loans is recorded as deferred income and recognized as income upon collection. Service fees are recorded as income upon receipt or when the related services are substantially completed.

The costs of acquisition of loans and accounts receivable and extra fees received are accounted for as adjustments to the book value and the effective interest of loans and accounts receivable.

Dividend revenue is recognized when the right of shareholder to receive dividend is established. The premise is that the economic benefits associated with the transaction are likely to flow into the Group and the amount of revenue can be reliably measured.

4.19 Leasing

The Group assesses whether the contract is (or includes) a lease on the contract date. For contracts that include the lease and non-lease components, the Group distributes the consideration in the contract on a relatively separate price basis and deals with them separately.

4.19.1 The Group as lessor

When the lease terms transfer almost all the risks and rewards attached to the ownership of the assets to the lessee, the leases are classified as finance leases. All other leases are classified as operating leases.

Under finance leases, lease payments include fixed payments, substantially fixed payments, variable lease payments which depend on an index or a rate, guaranteed residual values, and the exercise price of the purchase option that is reasonably certain to be exercised, and the rental termination penalties reflected in the lease term, less the incentives for the lease to be paid. The net amount of the lease investment is measured as the sum of the present value of both the lease receivable and the unguaranteed residual value plus the original direct costs and expressed as a finance lease receivable. The financing income is apportioned to each accounting period so as to reflect a periodic fixed rate of return that the Group's unexpired net

lease investment is available for each period. Under operating leases, the lease payments deducted from the lease incentives are recognized as income on a straight-line basis over the relevant lease periods. The original direct costs incurred in obtaining the operating leases are added to the carrying amount of the underlying assets and recognized as an expense on a straight-line basis over the lease terms.

4.19.2 The Group as lessee

The Group recognizes right-of-use assets and lease liabilities for all leases at the commencement date of a lease, except for short-term leases and low value asset leases accounted for applying a recognition exemption where lease payments are recognized as expenses on a straight line basis over the lease terms. Right-of-use assets are initially measured at cost, which comprises the initial measurement of lease liabilities adjusted for lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs needed to restore the underlying assets, and less any lease incentives received. Right-of-use assets are subsequently measured at cost less accumulated depreciation and adjusted for any remeasurement of the lease liabilities.

Right-of-use assets are depreciated using the straight-line method from the commencement dates of the lease to the earlier of the end of the useful lives of the right-of-use assets or the end of the lease terms.

Lease liabilities are initially measured at the present value of the lease payments, which comprise fixed payments, substantially fixed payments, variable lease payments which depend on an index or a rate, residual value guarantees, the exercise price of a purchase option if the Group is reasonably certain to exercise that option, and payments of penalties for terminating a lease if the lease term reflects such termination, less any lease incentives receivable. The lease payments are discounted using the interest rate implicit in a lease, if that rate can be readily determined. If that rate cannot be readily determined, the Group uses the lessee's incremental borrowing rate.

Subsequently, lease liabilities are measured at amortized cost using the effective interest method, with interest expense recognized over the lease terms. When there is a change in the amounts expected to be payable under a residual value guarantee, a change in the assessment of an option to purchase an underlying asset, or a change in future lease payments resulting from a change in an index or a rate used to determine those payments, the Group remeasures the lease liabilities with a corresponding adjustment to the right-of-use assets. However, if the carrying amount of the right-of-use asset has been reduced to zero, the remaining amount of remeasurement is recognized in profit or loss. Lease liabilities are presented separately in the consolidated balance sheets.

The Group and the lessor conducted rent negotiations directly related to COVID-19, and adjusted the rent due before June 30, 2022, which resulted in a decrease in rent. These negotiations did not significantly change other lease terms. The Group chose to adopt practical expedients to deal with all rent negotiations. Therefore, the Group does not have to assess whether the negotiation is a lease modification, but recognize the decrease in lease payments in rent concessions or circumstances when they occur in profit or loss (accounted for as other non-interest revenue, and the lease liability is relatively reduced).

4.20 Employee Benefits

4.20.1 Short-term employee benefits

Liabilities related to short-term employee benefits are measured and recognized at the undiscounted amount expected to be paid to employees for their services.

4.20.2 Retirement benefit costs

The Group currently has both defined contribution and defined benefit retirement plans for

its employees. Pursuant to local rules, employees working overseas are enrolled in defined contribution retirement benefit plan.

Payments to defined contribution retirement benefit plans are recognized as an expense when employees have rendered service entitling them to the contributions.

Defined benefit costs (including service cost, net interest and remeasurement) under the defined benefit retirement benefit plans are determined using the projected unit credit method. Service cost (including current service cost) and net interest on the net defined benefit liability (asset) are recognized as employee benefits expense in the period they occur. Remeasurement, comprising actuarial gains and losses and the return on plan assets (excluding interest), is recognized in other comprehensive income in the period in which they occur. Remeasurement recognized in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss.

Net defined benefit liability (asset) represents the actual deficit (surplus) in the Group's defined benefit plan. Any surplus resulting from this calculation is limited to the present value of any refunds from the plans or reductions in future contributions to the plans.

4.20.3 Employee preferential deposits

The Bank provides current and retired employees preferential interests rates for deposits under certain balances. Differences between preferential rate and interest at market rate are recognized as employee benefits.

Under rule No. 30 of the Regulations Governing the Preparation of Financial Reports by Public Banks, post-retirement preferential interests provided to retired employees should be measured and recognized using actuarial calculation pursuant to IAS No. 19 if variables for use in the actuarial assumptions are stipulated in official governing rules, then the rules should be applied first.

4.20.4 Other long-term employee benefits

Current employees who are eligible for retirement will be given a pension according to the retirement plan. If employees do not have the qualification to retire, (a) the pension will be issued for one month if the service lasts less than one year; (b) if the service lasts more than one year and less than five years, they will receive pension for one month for serving each full year; (c) if the service lasts for more than five years, the pension is calculated according to the actuarial calculation method. However, the calculation method is only applicable to the service that existed before the application of the new system.

4.21 Share-based payment arrangements

The fair value at the acquisition date of the employee share options is expensed on a straight-line basis over the vesting period, based on the Group's best estimates of the number of shares or options that are expected to ultimately vest, with a corresponding increase in capital surplus - employee share option. It is recognized as an expense in full at the grant date if vested immediately. The Group apply for cash capital increase to reserve employee subscriptions, and the acquisition date based on the day when the number of shares subscribed by employees is confirmed

4.22 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

4.22.1 Current tax

The Group determines the current income (loss) in accordance with the laws and regulations established by each jurisdiction of income tax declaration., and calculates the

payable (recoverable) income tax.

According to the Taiwan Income Tax Law, an additional tax on unappropriated earnings is recognized in the year the shareholders approve to retain earnings.

Adjustments of prior years' tax liabilities are added to or deducted from the current period's income tax expenses.

4.22.2 Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax liabilities are generally recognized on all taxable temporary differences. Deferred tax assets are recognized on deductible temporary difference and loss carry forwards provided that taxable income will be available for use in deducting the benefits of the temporary differences probably.

Deferred tax liabilities are recognized on taxable temporary differences associated with investments in subsidiaries and associates, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with these investments and interests are recognized only to the extent that it is probable that there will be sufficient taxable profits against which to use the benefits of the temporary differences and are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the assets to be recovered. A previously unrecognized deferred tax asset is also reviewed at the end of each reporting period and recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liabilities are settled or the assets are realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

4.22.3 Current tax and deferred tax of the period

Current tax and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current tax and deferred tax are also recognized in other comprehensive income or directly in equity, respectively.

5. CRITICAL ACCOUNTING JUDGMENTS AND MAIN SOURCES OF UNCERTAINTY IN ESTIMATES AND ASSUMPTIONS

In the application of the Group's accounting policies, the management is required to make judgments, estimates and assumptions on the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The Group takes the economic impact of COVID-19 into consideration in major accounting estimates such as cash flow estimation, growth rate, discount rate, and profitability, and the management will continue to

review the estimates and underlying assumptions. Revisions to accounting estimate are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Estimates and assumptions of main sources of uncertainty

Estimated impairment of financial assets

Estimates of impairment on loans and receivables, investments in debt instrument and financial guarantee contracts are based on the Group's assumptions about default rates and expected loss rates. The Group considers historical experience, current market conditions and forward-looking information to make assumptions and select input values for impairment assessments. For the important assumptions and input values used, refer to Note 40. If the actual cash flows in the future are less than expected, significant impairment losses may occur.

6. CASH AND CASH EQUIVALENTS

	Dec	cember 31, 2022	Decen	nber 31, 2021
Cash on hand and working fund	\$	14,867,502	\$	13,307,764
Checks for clearing		2,423,884		2,973,308
Due from other banks		46,465,927		54,100,741
	\$	63,757,313	\$	70,381,813

The Group assessed the allowance for cash and cash equivalents based on the expected credit loss model. Due to the low credit risk of cash and cash equivalents, allowance losses were recognized based on the 12-month expected credit losses. On December 31, 2022 and 2021, cash and cash equivalents recognized as allowances were in the amounts of \$311 thousand and \$1,802 thousand, respectively.

7. DUE FROM THE CENTRAL BANK AND CALL LOANS TO BANKS, NET

	ecember 31, 2022	 ecember 31, 2021	
Call loans to banks	\$ 290,467,003	\$ 180,488,033	
Deposit reserves - I	12,780,472	3,692,689	
Deposit reserves - II	28,882,268	23,341,841	
Deposit reserves - foreign currency	217,659	209,619	
Due from foreign central banks	4,206,115	3,833,977	
	\$ 336,553,517	\$ 211,566,159	

Deposit reserves are statutory reserves and determined monthly at prescribed rates based on average balances of customers' deposits. The entire balance of deposit reserves - II is subject to withdrawal restrictions while no restrictions are placed on other deposit reserves.

The Group assessed the loss allowance for due from the Central Bank and call loans to banks based on the expected credit loss model. Due to the low credit risk of dues from the Central Bank and call loans to banks, the loss allowance was recognized based on 12-month expected credit losses. On December 31, 2022 and 2021, the allowances recognized for the dues from the Central Bank and call loans to banks were in the amounts of \$7,769 thousand and \$8,561 thousand, respectively.

8. FINANCIAL INSTRUMENTS MEASURED AT FAIR VALUE THROUGH PROFIT OR LOSS (FVTPL)

		December 31, 2022	December 31, 2021
Financial assets at fair value through profit or loss			
Financial assets mandatorily classified as at FVTPL			
Government bonds	\$	3,621,989	\$ 49,286
Forward contracts		3,069,923	1,379,882
Shares		565,856	2,174,721
Beneficiary certificates		251,237	535,265
Currency swap contract		196,437	32,739
Option contracts		178,505	44,646
Corporate bonds		-	6,039,499
Interest rate swap contracts		-	174,788
Bank debentures		-	11,075
Others		104,960	156,111
	\$	7,988,907	\$ 10,598,012
	D	ecember 31, 2022	December 31, 2021
Financial liabilities at fair value through profit or loss		, , , , , , , , , , , , , , , , , , ,	,
Held-for-trading financial liabilities			
Forward contracts	\$	2,986,383	\$ 1,159,346
Currency swap contract		522,200	292,368
Interest rate swap contracts		176,821	850
Option contracts		97,848	150,266
-		3,783,252	1,602,830
Financial liabilities designated at FVTPL			i
Bank debentures		2,008,335	2,068,124
	\$	5,791,587	

The Group engaged in derivative transactions mainly to accommodate customers' needs and manage its exposure positions.

The financial assets and liabilities at FVTPL contract (nominal) amounts of derivative transactions were as follows:

	Dec	cember 31, 2022	December 31, 2021
	A		
Forward contracts	\$	490,213,536 \$	226,300,397
Option contracts		56,529,087	143,179,103
Currency swap contract		55,114,047	80,094,212
Interest rate swap contracts		2,601,485	2,886,697
Future contracts		-	158,533

Information for financial liabilities designated by the Group at FVTPL was as follows:

	December 31, 2022		Dec	ember 31, 2021
The difference between the fair value and the maturity value				
— Fair value	\$	2,008,335	\$	2,068,124
-Maturity value		1,973,649		2,110,011
	\$	34,686	\$	(41,887)

	Effects of changes in credit risk
Current amount of change	
From January1, 2022 to December 31, 2022	<u>\$ (60,356)</u>
From January1, 2021 to December 31, 2021	<u>\$ 17,650</u>
Cumulative amount of change	
Up to December 31, 2022	<u>\$ (36,294)</u>
Up to December 31, 2021	<u>\$ 24,062</u>

The financial liabilities designated by the Group at FVTPL were the second issuance of unsecured debentures amounting to US\$70,000 thousand with a 30-year maturity and fixed interest rate of 0% on October 29, 2018. On the expiration of 5 years and every subsequent year, the Group may exercise the option at the agreed redemption price. If the option is not exercised during the period, the payment will be made on the expiration date.

The Group entered an interest rate swap contract to reduce the interest rate risk of the aforementioned financial bonds. The interest rate swap contract was measured at fair value and the fair value changes were included in profit or loss. The Group designated the aforementioned financial bonds as financial liabilities measured at FVTPL for consistency.

The amount of change in the fair value of financial bonds and the combination of financial assets attributable to the changes in the fair value of financial liabilities and the combination of the fair value of financial assets was calculated as the difference between the changes in the fair value of market risk factor. The amount of change in fair value attributable to the market risk factor was calculated using the benchmark yield curve at the balance sheet date. Fair value of financial bonds and combined commodities was based on the benchmark yield curve on the balance sheet date and the estimated credit risk spread by the creditor's interest rate quote on the similar maturity date of the combined company, such that the estimated future cash flow is discounted.

9. FINANCIAL ASSETS MEASURED AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME

	Dee	cember 31, 2022	December 31, 2021
Investments in equity instruments measured at FVTOCI Shares	\$	22,073,286	\$ 23,077,179
Investments in debt instruments measured at FVTOCI			
Corporate bonds		169,460,409	212,429,395
Bank debentures		119,245,194	158,984,827
Government bonds		53,810,795	52,308,637
Commercial papers		34,959,789	65,589,207
Asset-backed securities		1,234,301	2,681,127
Treasury bonds		-	3,486,483
		378,710,488	495,479,676
	\$	400,783,774	\$ 518,556,855

The Group invests in ordinary shares for medium- and long-term strategic purposes and expects to make a profit through long-term investments. The management of the Group considers that if the short-term fair value fluctuations of these investments are included in profit or loss, they are inconsistent with the aforementioned long-term investment plans. Therefore, the designated investments are selected to be measured at FVTOCI.

For the information on credit risk management and impairment assessment of investments in debt instruments at FVTOCI, refer to Note 11.

Parts of the aforementioned financial assets at FVTOCI were sold under repurchase agreements as of December 31, 2022 and 2021. The par values of bonds and commercial papers sold under repurchase agreements were \$775,000 thousand and \$14,466,728 thousand, respectively.

10. INVESTMENTS IN DEBT INSTRUMENTS MEASURED AT AMORTIZED COST

	Dec	De	cember 31, 2021	
Negotiable certificates of deposit	\$	178,510,000	\$	132,400,000
Government bonds		17,387,739		7,591,898
Treasury bonds		-		11,987,492
Corporate bonds		6,395,097		2,646,795
Bank debentures		8,695,243		859,025
Restricted due from banks		2,917,036		3,835,505
		213,905,115		159,320,715
Less: Loss allowance		(3,197))	(1,127)
	\$	213,901,918	\$	159,319,588

Restricted due from banks are the funds deposited into specific bank accounts by the Group in compliance with Act of The Management, Utilization, and Taxation of Repatriated Offshore Funds.

For information on the credit risk management and impairment of financial assets measured at amortized cost, refer to Note 11.

For the information on related financial assets at amortized cost pledged as collateral, refer to Note 38.

11. CREDIT RISK MANAGEMENT OF INVESTMENTS IN DEBT INSTRUMENTS

The investments in debt instruments were classified as financial assets measured at FVTOCI and financial assets at amortized cost.

December 31, 2022	 At FVTOCI	At Amortized Cost		Total
Total carrying amount Loss allowance	\$ 395,453,946 (217,976)	\$ 213,905,115 (3,197		609,359,061 (221,173)

-	\$ 495,479,676		\$	654,799,264

The Group implements a policy of investing in debt instruments with investment grade and have low credit risk. For the purpose of impairment assessment, the Group continues to track external rating information and monitors changes in credit risk of the investments of debt instruments and reviews other information such as the bond yield curve and the debtor's material information to assess whether the credit risk of the debt instrument investments has increased significantly since the initial recognition.

The Group considered the historical default loss rate provided by the independent rating agencies, the debtor's current financial status and the industry's forward-looking forecast to measure the 12-month expected credit loss or full lifetime expected credit loss of the investments in debt instruments. The Group's current credit risk rating mechanism and the total carrying amount of each credit rating investment in debt instruments were as follows:

December 31, 2022

Credit Rating	Definitions	Expected Credit Loss Recognition Base	Expected Credit Loss Rate	December 31, 2022 Carrying Amount
Stage 1	The debtor has a low credit risk and is fully capable of paying off contractual cash flows	12-month expected credit loss	0.000%~0.816%	\$ 608,240,887
Stage 2	Credit risk has increased significantly since the initial recognition	Expected credit loss during the period of existence (no credit impairment)	0.308%~3.40%	919,451
Stage 3	Evidence of credit impairment	Expected credit loss during the period of existence (credit impairment)	40.974%~56.123%	198,723

December 31, 2021

Credit Rating	Definitions	Expected Credit Loss Recognition Base	Expected Credit Loss Rate	December 31, 2021 Carrying Amount
Stage 1	The debtor has a low credit risk and is fully capable of paying off contractual cash flows	12-month expected credit loss	0.000%~0.896%	\$ 653,629,515
Stage 2	Credit risk has increased significantly since the initial recognition	Expected credit loss during the period of existence (no credit impairment)	0.340%~7.017%	792,656

Information on changes in allowance for impairment loss under the credit risk rating assessment of investments in debt instruments at FVTOCI and at amortized cost is summarized as follows:

The Group did not have any impairment losses on the properties for the year ended December 31, 2022 and 2021.

The land held by the subsidiary SCB (HK) is a leasehold interest.

Depreciation expense of properties held by SCSB is computed using the straight-line method over the useful life as follows:

Buildings and improvements	
Branches offices	43-55 years
Air conditioning and machine rooms	9 years
Mechanical equipment	3-8 years
Transportation equipment	5-10 years
Miscellaneous equipment	5-20 years

Depreciation expense of the land held by SCB (HK) is computed using the straight-line method; depreciation expense of the buildings is computed over the lease term or the straight-line method of less than 40 durable years. Other equipment is computed using the straight-line method within the durability of 4 to 10 years.

The board of directors of the subsidiary SCSB Asset Management Ltd. approved the plan to dispose of land, buildings and improvements on December 16, 2020, and completed the signing and transfer procedures in January 2021, so the assets were reclassified as assets held for sale. Because the selling price exceeds the book value, no impairment loss was recognized.

19. LEASE ARRANGEMENTS

19.1 Right-of-use assets

	Dece	December 31, 2021		
Carrying amount of right-of-use assets				
Buildings and improvements	\$	1,752,678	\$	1,657,419
Office equipment		43,534		61,237
Mechanical equipment		43,406		56,968
Transportation equipment		26,326		32,213
Land		5,326		2,082
	\$	1,871,270	\$	1,809,919

	For the Year Ended December 3			
		2022		2021
Increase in right-of-use assets	\$	722,788	\$	524,884
Depreciation expenses of right-of-use assets				
Buildings and improvements	\$	727,718	\$	698,992
Office equipment		25,244		23,824
Mechanical equipment		18,226		19,165
Transportation equipment		13,782		14,411
Land		1,977		1,285
	\$	786,947	\$	757,677

19.2 Lease liabilities

	December 31, 2022		December 31, 2021	
Carrying amount of lease liabilities	\$	1,925,887	\$	1,868,929

The discount rate intervals for lease liabilities are as follows:

	December 31, 2022	December 31, 2021
Land	7.52%	6.19%
Buildings and improvements	0.44%~7.52%	0.67%~6.19%
Mechanical equipment	0.60%~7.52%	1.25%~6.19%
Office equipment	0.75%~2.77%	0.75%~3.00%
Transportation equipment	0.60%~2.92%	1.25%~4.90%

19.3 Other lease information

	For the Year Ended December 31			
		2022		2021
Short-term lease expenses	\$	34,142	\$	61,612
Leases of low value assets	\$	65,628	\$	62,069
Variable lease payments which are not included in lease				
liabilities measurements	\$	3,799	\$	3,314
Total cash outflow for leases	\$	918,285	\$	834,236

The Group chooses to apply recognition exemption to the rentals of buildings, office equipment, transportation equipment that qualify as short-term lease and computer equipment which qualify as low value assets, and did not recognize related right-of-use assets and lease liabilities.

Net amount	<u>\$ 5,806,484</u>			<u>\$ 5,981,151</u>

The land held by the subsidiary SCB (HK) is a leasehold interest.

Depreciation expense of investment properties is computed using the straight-line method over useful life as follows:

Land	Period of the lease term
Buildings and improvements	Period of the lease term or 40 years, whichever is shorter

The fair value of investment properties were measured mainly by Cushman & Wakefield, an independent appraiser, on the balance sheet date. The valuation applies popular Level 3 input valuation models such as the "direct comparison approach" and the "income capitalization approach". The applied unobservable inputs include sales proofs from market, potential market rentals, and related costs such as building costs, consulting costs, and financing costs. The fair value is stated below:

	Dece	mber 31, 2022	December 31	, 2021
Fair value	\$	10,356,677	\$ 10,	082,090

The rental income from investment properties is stated below:

	For the Year Ended December 31			
		2022	2021	
Rental income from investment properties	\$	255,019 \$	214,903

Amortization expense is computed using the straight-line method over the useful lives as follows:

Bank license	84 years
Computer software	3-5 years

Goodwill was mainly from the control premium generated by the acquisition of Cambodian AMK on August 28, 2018. It also included the expected synergies, revenue growth, and future market development.

The Group underwent the impairment assessment of the recoverable amount of goodwill, and the calculation of the recoverable amount was based on the value in use. The calculation of the value in use was based on the cash flow of AMK's future financial projections and was calculated using the annual discount rate to reflect the specific risks of AMK. The assessment results showed no sign of impairment. The Group did not need to recognize impairment loss on goodwill in 2022 and 2021.

The third issuance of the 2012 bank debenture was classified into two types, Types A and B, in accordance with the issued terms. Their terms and methods of interest accrual were as follows: Type A, seven-year of subordinated bank debenture at a fixed annual interest rate of 1.43%; Type B, ten-year of subordinated bank debenture at a fixed annual interest rate of 1.55%. The interests were paid annually with the repayment of principals at maturity.

The fourth issuance of the 2012 bank debenture was classified into two types, Types A and B, in accordance with the issued terms. Their terms and methods of interest accrual were as follows: Type A, seven-year of subordinated bank debenture at a fixed annual interest rate of 1.43%; Type B, ten-year of subordinated bank debenture at a fixed annual interest rate of 1.55%. The interests were paid annually with the repayment of principals at maturity.

The first issuance of the 2014 bank debenture was classified into two types, Types A and B, in accordance with the issued terms. Their terms and methods of interest accrual were as follows: Type A, seven-year of subordinated bank debenture at a fixed annual interest rate of 1.70%; Type B, ten-year of subordinated bank debenture at a fixed annual interest rate of 1.85%. The interests were paid annually with the repayment of principals at maturity.

The second issuance of the 2014 subordinated bank debenture: seven-year of subordinated bank debenture at a fixed interest rate of 1.83% with the interest paid annually and the repayment of principal at maturity.

The first issuance of the 2015 subordinated bank debenture had a fixed interest rate of 1.83% with the interest paid annually and the repayment of principal at maturity

The second issuance of the 2015 subordinated bank debenture had a fixed interest rate of 1.83% with the interest paid annually and the repayment of principal at maturity.

The first issuance of the 2017 bank debenture was classified into two types, Types A and B, in accordance with the issued terms. Their terms and methods of interest accrual were as follows: Type A, seven-year of subordinated bank debenture at a fixed annual interest rate of 1.50%; Type B, ten-year of subordinated bank debenture at a fixed annual interest rate of 1.85%. The interests were paid annually with the repayment of principals at maturity.

The second issuance of the 2017 bank debenture was classified into two types in accordance with the issued terms and the methods of interest accrual: Types A and B. Their terms and methods of interest accrual were as follows: Type A, seven-year of subordinated bank debenture at a fixed annual interest rate of 1.30%; Type B, ten-year of subordinated bank debenture at a fixed annual interest rate of 1.55%. Their interests were paid annually with repayment of principals at maturity.

The first issuance of the 2018 bank debenture was classified into two types in accordance with the issued terms and the methods of interest accrual: Types A and B. Their terms were as follows: Type A, seven-year

of subordinated bank debenture at a fixed annual interest rate of 1.25%; Type B, ten- year of subordinated bank debenture at a fixed annual interest rate of 1.45%. Their interests were paid annually with repayment of principals at maturity.

The third issuance of the 2018 subordinated bank debenture was at a fixed annual interest rate of 2.15% with the interest paid annually and the repayment of principal at maturity.

The first issuance of the 2019 bank debenture was classified into two types in accordance with the issued terms and the methods of interest accrual: Types A and B. Their terms were as follows: Type A, three-year of bank debenture at a fixed annual interest rate of 0.65%; Type B, five-year of bank debenture at a fixed annual interests were paid annually with repayment of principals at maturity.

The first issuance of the 2020 bank debenture was classified into two types in accordance with the issued terms and the methods of interest accrual: Types A and B. Their terms were as follows: Type A, seven-year of bank debenture at a fixed annual interest rate of 0.62%; Type B, ten-year of bank debenture at a fixed annual interests were paid annually with repayment of principals at maturity.

The first issuance of the 2021 bank debenture was classified into two types in accordance with the issued terms and the methods of interest accrual: Types A and B. Their terms were as follows: Type A, seven-year of subordinated bank debenture at a fixed annual interest rate of 0.60%; Type B, ten-year of subordinated bank debenture at a fixed annual interest rate of 0.72%. Their interests were paid annually with repayment of principals at maturity.

The first issuance of the 2022 bank debenture was classified into two types in accordance with the issued terms and the methods of interest accrual: Types A and B. Their terms were as follows: Type A, three-year of bank debenture at a fixed annual interest rate of 1.60%; Type B, five-year of bank debenture at a fixed annual interests were paid annually with repayment of principals at maturity.

The second issuance of the 2022 bank debenture was at a fixed annual interest rate of 1.40% with the interest paid annually and the repayment of principal at maturity.

The third issuance of the 2022 subordinated bank debenture was at a fixed annual interest rate of 3.25% with the interest paid annually and the repayment of principal at maturity.

31. PENSION PLAN

The Bank

(1) Defined contribution plans

The Bank adopted a pension plan under the Labor Pension Act (LPA), which is a state-managed defined contribution plan. Under the LPA, an entity makes monthly contributions to employees' individual pension accounts at 6% of monthly salaries and wages.

The total amounts of contributions to the defined contribution plans for the year ended December 31, 2022 and 2021 were \$97,354 thousand and \$87,910 thousand, respectively.

(2) Defined benefit plans

The defined benefit plans adopted by the Bank in accordance with the Labor Standards Law is operated by the government of Taiwan. Pension benefits are calculated on the basis of the length of service and average monthly salaries of the 6 months before retirement. The Bank contribute amounts equal to 10% of total monthly salaries and wages to a pension fund administered by the pension fund monitoring committee. Pension contributions are deposited in the Bank of Taiwan in the committee's name. Before the end of each year, the Bank assesses the balance in the pension fund. If the amount of the balance in the pension fund is inadequate to pay retirement benefits for employees who conform to retirement requirements in the next year, the Bank is required to fund the difference in one appropriation that should be made before the end of March of the next year. The pension fund is managed by the Bureau of Labor Funds, Ministry of Labor (the "Bureau"); the Bank has no right to influence the investment policy and strategy.

The amounts included in the consolidated balance sheets in respect of the Bank's defined benefit plans were as follows:

	Dece	mber 31, 2022	December 31, 2021	
Present value of the defined benefit obligation Fair value of the plan assets	\$	3,179,013 (3,371,630)		3,232,621 (3,179,529)
Net defined benefit (assets) liabilities	\$	(192,617)	\$	53,092

Movements in net defined benefit (assets) liabilities were as follows:

Contributions from the employer

Balance on December 31, 2022

Recognized in other comprehensive income		59,410		(173,711)		(114,301)

Through the defined benefit plans under the Labor Standards Law, the Bank is exposed to the following risks:

\$

(284,855)

\$

3,179,013

(278,609)

284,855

(3,371,630)\$

(278,609)

(192,617)

- A. Investment risk: The plan assets are invested in domestic and foreign equity and debt securities, bank deposits, etc. The investment is conducted at the discretion of the Bureau or under the mandated management. However, in accordance with relevant regulations, the return generated by plan assets should not be below the interest rate for a 2-year time deposit with local banks.
- B. Interest risk: A decrease in the government bond interest rate will increase the present value of the defined benefit obligation; however, this will be partially offset by an increase in the return on the plans' debt investments.
- C. Salary risk: The present value of the defined benefit obligation is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the present value of the defined benefit obligation.

The actuarial valuations of the present value of the defined benefit obligation were carried out by qualified actuaries. The significant assumptions used for the purposes of the actuarial valuations were as follows:

	December 31, 2022	December 31, 2021
Discount rate	1.25%	0.75%
Expected rate of salary increase	2.75%	2.75%

If possible reasonable changes in each of the significant actuarial assumptions will occur and all other assumptions will remain constant, the present value of the defined benefit obligation will increase (decrease) as follows:

	December 31, 2022			December 31, 2021		
Discount rate	¢.	((7.822))	ሱ	(72,002.)		
0.25% increase	\$	(67,832)	\$	(73,992)		
0.25% decrease	\$	69,932	\$	76,433		
Expected rate of salary increase						
0.25% increase	\$	57,246	\$	62,261		
0.25% decrease	\$	(55,768)	\$	(60,544)		

The sensitivity analysis presented above may not be representative of the actual changes in the present value of the defined benefit obligation as it is unlikely that changes in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

	Decen	nber 31, 2022	December 31, 2021
Average duration of the defined benefit obligation		8.8 years	9.5 years
Expected contributions to the plans for the next year	\$	286,271 \$	389,834

(3) Employee preferential deposit plan

The Bank's obligation to pay the quota deposits of current staff and retired employees is based on the Bank's relevant employee preferential deposit benefits. In accordance with the guidelines for the Regulations Governing the Preparation of Financial Reports by Public Banks, the Bank needs to measure on the excess interest arising from the post-retirement preferential deposit interest rate through actuarial process.

The actuarial assumptions of the retired employees' preferential deposit and welfare expenses are based on the Banking Bureau's requirement dated March 15, 2012 (Ref. No. 10110000850). The assumptions are as follows:

	December 31, 2022	December 31, 2021
Discount rate	4.00%	4.00%
Deposit rate of return	2.00%	2.00%
Preferential deposit withdrawal rate	2.00%	2.00%
Change in the preferential deposit policy	50.00%	50.00%
The amount of the Bank's obligations arising from	the preferential deposit pla	an for retired employees

The amount of the Bank's obligations arising from the preferential deposit plan for retired employees is included in the balance sheet as follows:

	Decen	nber 31, 2022	December 31, 2021		
Retired employees' preferential deposit liabilities, net	\$	562,070	\$	518,675	

The amounts of the retired employees' preferential deposit benefit expenses in the consolidated statements of comprehensive income for the year ended December 31, 2022 and 2021 were \$87,859 thousand and \$68,225 thousand, respectively; and in other comprehensive losses were \$15,597 thousand and \$28,986 thousand, respectively.

(4) Other long-term employee benefit liabilities

Current employees who are eligible for retirement will be given a pension according to the retirement plan. If employees do not have the qualification to retire, (a) the pension will be paid for one month if the service lasts less than one year; (b) if the service lasts more than one year and less than five years, they will receive pension for one month for serving each full year; (c) if the service

lasts for more than five years, the pension is calculated according to the actuarial calculation method. However, the calculation method is only applicable to the service that existed before the application of the new system.

The amounts of the Bank's obligations arising from the employee's pension were included in the balance sheets as follows:

	Decei	nber 31, 2022	December 31, 2021		
Other long-term employee benefit liabilities, net	\$	12,462	\$	10,469	

The Bank recognized employee pension benefit cost of \$1,993 thousand and \$166 thousand in the consolidated statements of comprehensive income for the year ended December 31,2022 and 2021, respectively.

SUBSIDIARIES

(1) Defined contribution plans

The Bank adopted a pension plan under the LPA, which is a defined contribution plan. Under the LPA, an entity makes monthly contributions to employees' individual pension accounts at 6% of monthly salaries and wages. Retirement benefits provided by foreign subsidiaries in accordance with local laws and regulations are funded, and the pension funds are held as independently managed funds separate from the assets of the foreign subsidiaries.

The total amounts of contributions to the defined contribution plans as reported in the consolidated statements of comprehensive income for the year ended December 31, 2022 and 2021 were \$312,279 thousand and \$281,049 thousand, respectively.

(2) Defined benefit plans

Domestic and foreign subsidiaries recognize the relevant costs based on the results of the evaluation of the actuary. Costs of the defined benefit plans recognized in the consolidated statements of comprehensive loss in 2022 and 2021 were \$409 thousand and \$217 thousand, respectively; and other comprehensive were loss and income \$311 thousand and \$4,262 thousand, respectively.

Provision for employee benefits

	Decer	mber 31, 2022	December 31, 2021		
Defined benefit liabilities	\$	913,898	\$	803,827	
Retired employees' preferential deposit liabilities		562,070		518,675	
Other long-term employment benefits		12,462		10,469	
	\$	1,488,430	\$	1,332,971	

32. EQUITY

32.1 Share capital

	December 31, 2022	December 31, 2021
Ordinary shares		
Authorized shares (in thousands)	6,000,000	6,000,000
Authorized capital	\$ 60,000,000	\$ 60,000,000
Issued and paid shares (in thousands)	4,861,603	4,481,603
Issued capital	\$ 48,616,031	\$ 44,816,031

The issued ordinary share has par value of \$10. Each shareholder is entitled with the right to vote and receive dividends.

To improve capital adequacy and increase working capital, the Bank's board of directors approved to issue 380,000 thousand of new shares in additional capital on August 13, 2022. The issue price per share is \$37, and the total issue amount is \$14,060,000 thousand. TWSE approved the IPO on October 11, 2022. The Bank's board of directors decided that the base date for capital increase is on December 15, 2022, the full share payment was received by December 14, 2022, and the change of registration was completed on December 28, 2022.

32.2 Capital surplus

	 December 31, 2022	December 31, 2021
Share premium	\$ 24,049,635	\$ 13,431,903
Treasury shares transaction	2,056,000	2,046,520
Unclaimed dividends	1,213,392	1,100,985
Recognition of changes in equity of subsidiaries	85,518	85,518
Proportionate share in investee's surplus from donated		
assets under the equity method	1,218	1,218
	\$ 27,405,763	\$ 16,666,144

The capital surplus from shares issued in excess of par (including additional paid-in capital from the issuance of ordinary shares, conversion of bonds and treasury share transactions) and donations may be capitalized from capital surplus into share capital, which is limited to a certain percentage of the Bank's paid-in capital.

The capital surplus from investments accounted for using the equity method, dividends not yet collected by shareholders has limited use and can only be used to offset losses.

Since the shares held by subsidiaries were classified as treasury shares, cash dividend distributed to subsidiaries was then recorded as capital surplus - treasury shares according to the shareholding ratio.

When the equity of the company is not actually obtained or processed, the impact of the equity transaction recognized due to changes in the company's equity or the company's recognition of the adjustment to the capital reserve of the subsidiary identified using the equity method.

32.3 Retained earnings and dividend policy

According to the earnings distribution policy of the Bank, where the Bank made a surplus profit in its annual accounts, the profit shall be first utilized for paying taxes and then offsetting losses of previous years. As required by the law, 30% of profit shall be allocated as the legal reserve. However, when the amount of statutory surplus reserve has reached the amount of total paid-in capital of the Bank, the required allocation of 30% of profit to the legal reserve is waived and any amount exempted from allocation to capital reserve may be appropriated to or reversed from the special surplus reserve for distribution of special dividends. After the abovementioned appropriations, the balance and accumulated unappropriated earnings of the previous year, including the special reserve shall be available for earnings for distribution. The board of directors drafts a plan for surplus distribution and submits it to the shareholders' meeting for approval.

If the Bank has no deficit and the legal reserve has exceeded 25% of the Bank's paid-in capital, the excess may be corrected into capital (share capital) or distributed in cash. However, under the Banking Act, if legal reserve is less than its paid-in capital, the Bank is allowed to distribute cash earnings only up to 15% of its capital. For the estimation on the distribution of employees' compensation and remuneration of directors, refer to employee benefits expense in Note 33(6).

The Bank has made special reserves for the adoption of IFRS in accordance with Rule No. 1010012865 issued by the FSC on April 6, 2012 and the directive titled "Questions and Answers for Special Reserves Appropriated Following Adoption of IFRSs".

The Bank held the shareholders' meeting on June 17, 2022 and July 5, 2021 for the appropriations of earnings and dividends per share for 2021 and 2020 were as follows:

	_	Appropriat	ion of H	Carnings	Dividend (In N	ls Per S T Doll	
		2021		2020	 2021		2020
Legal reserve	\$	4,251,394	\$	3,879,721			
Cash dividends - ordinary shares		8,066,886		7,618,725	\$ 1.80	\$	1.70
	\$	12,318,280	\$	11,498,446	\$ 1.80	\$	1.70

The appropriations of earnings and dividends per share for 2022 are subjected to the approval of the board directors' meeting on March 23, 2023 and shareholders' meetings on June 13, 2023.

32.4 Special reserve

The Bank made a special reserve due to the transfer of \$1,256,859 thousand of its cumulative translation adjustment reported in equity to retained earnings upon first-time IFRS adoption. There was no change in the balance of the special reserve for the year ended December 31, 2022.

According to Rule No. 10510001510 issued by the FSC on May 25, 2016, public banks shall appropriate to a special reserve 0.5% to 1.0% of net profit. Public banks may reverse the same amount of transfers or resettle the expenses starting from 2017. However, in accordance with Rule No. 10802714560 issued by the FSC, starting from 2019, the special reserve method will no longer be used to respond to the development of financial technology and protect the rights and interests of domestic bank employees, and to transfer expenses for employees to pay or resettlement expenses, and employee education and training expenses in response to the needs of financial technology or banking business development shall be returned within the scope of the special surplus reserve balance mentioned above. The Bank made a special reserve in the amount of \$189,228 thousand according to the rule as at December 31, 2022.

32.5 Treasury shares

On December 31, 2022 and 2021, SCB (HK) and China Travel Service (Taiwan) held 11,370 thousand shares and 27 thousand shares of the Bank, respectively.

Under the Company Act, the Bank is not allowed to buy back more than 5% of its issued shares. In addition, the total cost of treasury shares may not exceed the sum of the retained earnings and realized capital surplus. The Bank is not allowed to exercise shareholders' rights on these shares before they are resold. The shares held by its subsidiaries are treated as treasury shares, except for participating in the Bank's cash addition and voting rights, the rest is the same as the general shareholder's rights.

32.6. Non-controlling interests

	For the Year Ended December 31

33.6 Compensation of employees and remuneration of directors

The employees' compensation and remuneration of directors were at the rates of no less than 0.1% and no higher than 0.6%, respectively, of net profit before income tax, employees' compensation and directors' remuneration.

The employees' compensation and the remuneration of directors for 2021 as approved by the board of directors on March 26, 2022 were as follows:

	For the Year End	ed December 31, 2021
		Cash
Compensation of employees	\$	60,000
Remuneration of directors	\$	50,800

The compensation of employees and the remuneration of directors for 2022 were as follows:

	For the Year Ende	ed December 31, 2022
		Cash
Compensation of employees	\$	76,000
Remuneration of directors	\$	48,500

The employees' compensation and remuneration of directors in 2022 are subject to the resolution of the board of directors on March 23, 2023.

If the amount of the annual consolidated financial report changes after the release date, it will be treated according to the changes in accounting estimation and will be adjusted in the next year.

There was no difference between the actual amounts of employees' compensation and remuneration of

directors paid and the amounts recognized in the consolidated financial statements for the year ended December 31, 2021 and 2020.

Information on the employees' compensation and remuneration of directors resolved by the Bank's board of directors in 2023 and 2022 is available on the Market Observation Post System website of the Taiwan Stock Exchange.

34.5 Income tax assessments

The Bank's income tax returns through 2019 had been assessed by the tax authorities.

Income tax returns of the Bank's domestic subsidiaries through 2020 had been assessed by the tax authorities.

35. EARNINGS PER SHARE

The numerators and denominators used in calculating basic earnings per share were as follows:

	Fo	r the Year Er	it: NT\$ Per Share ecember 31
	2	2022	2021
Basic earnings per share	\$	3.33	\$ 3.19
Diluted earnings per share	\$	3.33	\$ 3.19

The earnings and weighted average number of ordinary shares outstanding in the computation of earnings per share were as follows:

Net Profit for the Period

	For the Year Ended December 31				
	2022			2021	
Earnings used in the computation of basic and diluted earnings per share	\$	14,937,870	\$	14,255,581	

Weighted average number of ordinary shares outstanding (in thousands of shares):

	For the Year Ended December 31				
	2022	2021			
Weighted average number of ordinary shares in computation of					
basic earnings per share	4,487,904	4,470,206			
Effect of potentially dilutive ordinary shares:					
Employees' compensation	1,968	1,606			
Weighted average number of ordinary shares used in the					
computation of diluted earnings per share	4,489,872	4,471,812			

In the computation of diluted earnings per share, it assumed the entire amount of the compensation will be settled in potential shares. If the Bank offered to settle compensation paid to employees in cash or shares, the potential shares are included in the computation of diluted earnings per share until the number of shares to be distributed to employees is resolved in the following year.

36. SHARE-BASED PAYMENT ARRANGEMENTS

Employee share option plan of the Bank

The board of directors approved the issuance of new shares on August 13, 2022 and resolved to allocate 15% of the new shares for subscription by its employees according to the Company Law. According to IFRS 2 "share-based payment", the employee's share options should be measured at fair value, and the related compensation costs were \$357,732 thousand. The relevant information of employee share options is as follows:

	For the Year Ended December 31
	2022
Employee Share Option	Unit (In Thousands of Shares)
Options granted	57,000
Options exercised	53,990
Options expired	3,010
Weighted-average fair value of options granted (NT\$ per share)	\$ 6.276

Options granted were priced using the Black-Scholes pricing model, and the inputs to the model are as follows:

	For the Year Ended December 31
	2022
Acquisition date share price (NT\$/per share)	43.20
Exercise price (NT\$/per share)	37.00
Expected volatility	18.40%
Option life (in days)	56
Dividend yield	-
Risk-free interest rate	1.07%

The expected volatility is based on the historical stock price volatility calculated by peers.

37. RELATED-PARTY TRANSACTIONS

The relationship, significant transactions and account balances of the Group and its related parties (except those disclosed in other notes) are summarized as follows:

37.1 The Bank's related parties

	For the Year En	ded December 3	31
	 2022	2021	
The SCSB Cultural & Educational Foundation	\$ 1,275	\$	1,272

For the rental contracts with related parties, the rental is determined in proportion to similar rentals in the area, based on a reference to the rentals in the neighborhood, and is received on a monthly basis.

37.2.6 Loans

December 31, 2022								For the	
Category	Name	Maximum Balance	Ending Balance	Perfor Normal Loans	mance Non- performing Loans	Collateral	Interest Rate (%)	Difference of Terms of the Transactions with Unrelated Parties	Year Ended December 31, 2022 Interest Income
Loans for personal house mortgages Others	Directors and related management (2) Directors and related management (5)	\$ 7,812 	\$ 7,150 <u>188,420</u> <u>\$ 195,570</u>	\$ 7,150 <u>188,420</u> <u>\$ 195,570</u>	-	Real estate Real estate/ financial instruments	1.33-2.10 1.36-2.23	None	\$ 127 <u>19,902</u> <u>\$ 20,029</u>
			Dece	mber 31, 2021					For the
Category	Name	Maximum Balance	Ending Balance	Perfor Normal Loans	mance Non- performing Loans	Collateral	Interest Rate (%)	Difference of Terms of the Transactions with Unrelated Parties	Year Ended December 31, 2021 Interest Income
Loans for personal house mortgages Others	Directors and related management (1) Directors and related management (9)	\$ 608 <u>155,372</u> \$ 155,980	\$ 180 <u>140,010</u> \$ 140,190	\$ 180 <u>140,010</u> \$ 140,190	-	Real estate Real estate/ financial instruments	1.56-1.57 1.29-1.49	None	\$ 6 <u>11,549</u> \$ 11,555

37.2.7 Disposal of property, plant and equipment

	Transactio For the Year End		Gain (Loss) on Disposal December 31		
Name of related-party	2022	2021	2022	2021	
Others	<u>\$ 341,264</u>	<u>\$</u>	<u>\$ 208,377</u>	<u>\$</u>	

Employee deposits and loans have better interest rates within regulated limits, while other related party transactions have similar terms as non-related party transactions.

Under the provisions of Articles 32 and 33 of the Banking Act, the Bank shall not make unsecured loans to related party, except for consumer loans under certain limits, and government loans. Secured loans to a related party should be fully guaranteed, and the relevant terms should not be superior to other similar credit clients.

37.3 Compensation of directors and management personnel

The compensation of key management personnel for the year ended December 30, 2022 and 2021 was as follows:

	For the Year Ended December 31				
		2022		2021	
Salaries and other short-term employee benefits	\$	569,715	\$	498,603	
Bonuses and compensation of employees		108,349		84,217	
Remuneration of directors		113,001		124,334	
Post-employment benefits		46,602		39,841	
Others		985		864	
	\$	838,652	\$	747,859	

38. PLEDGED ASSETS

Under the Central Bank's clearing system of Real-Time Gross Settlement (RTGS), on December 31, 2022 and 2021, the assets listed below had been provided as collateral for day-term overdrafts with the pledged amount adjustable at any time.

	Decemb	er 31, 2022	Decemb	oer 31, 2021	Guaranty Purpose				
The Bank Investments in debt instruments measured at amortized cost	\$	12,000,000	\$	12,000,000	Day-term overdraft with the pledge				
On December 31, 2022 and 2021, the Bank provided financial assets at FVTOCI listed below which had been provided as operating guarantees.									

	December	31, 2022	December 31, 2021	Guaranty Purpose
The Bank Financial assets at FVTOCI	\$	374,374 \$	346,624	Operating guarantee

On December 31, 2022 and 2021, SCB (HK) and its overseas branch provided financial assets at amortized cost listed below which had been provided as operating guarantees.

	Decembe	er 31, 2022	Decemb	er 31, 2021	Guaranty Purpose
The SCB (HK) Investments in debt instruments measured at amortized cost	\$	14,492,470	\$	4,872,533	Operating guarantee

On December 31, 2022 and 2021, SCB (HK) and its overseas branch provided financial assets at FVTOCI listed below which had been provided as operating guarantees.

	Decembe	er 31, 2022	December 31, 2021	Guaranty Purpose
The SCB (HK) Financial assets at FVTOCI	\$	7,687,498 \$	21,270,542	Operating guarantee

39. SIGNIFICANT CONTINGENT LIABILITIES AND UNRECOGNIZED COMMITMENTS

39.1 In addition to those disclosed in other notes, significant commitments and contingencies of the Group as of December 31, 2022 and 2021, were as follows:

	Dee	cember 31, 2022	December 31, 2021
Commitments of forward contracts with customers	\$	486,066,103 \$	312,461,232
Securities in custody		287,735,328	242,180,397
Assets under trust		204,855,065	212,201,956
Guarantee notes payable		116,972,245	164,076,416
Receivables under custody		27,204,605	32,484,286
Government bonds in brokerage accounts		25,149,200	29,466,700
Short-term bills in brokerage accounts		1,563,190	559,450

39.2 Material litigation

Vegesentials commenced civil proceedings before the Business and Property Courts of the High Court of Justice of England and Wales against the Bank on August 28, 2020. Vegesentials claimed that it relied upon a fraudulent document issued by a former employee of the Bank to enter into a transaction which stated (inter alia) that the counterparty had the funds to purchase some of its shares. Vegesentials therefore asked the Bank to compensate it for its loss on the basis of vicarious liability. After receiving Vegesentials' claim on September 18, 2020, the Bank engaged English legal counsel to defend the Bank in the proceedings.

The Bank was notified by a British lawyer that Vegesentials claimed the amount of compensation over $\pounds 10$ million on April 25, 2022, but has only provided very limited evidence. Therefore, the Bank assesses that the litigation should have no significant impact on the Bank's financial business at this stage.

Relevant information about the above litigation is available in the material information on the Market Observation Post System website of the Taiwan Stock Exchange.

40. FINANCIAL INSTRUMENTS

- 40.1 Fair value information financial instruments not measured at fair value
 - 40.1.1 Financial assets and liabilities with significant differences between carrying amounts and fair values.

Except as detailed in the following table, the Group's management considers that the carrying amounts of financial instruments not measured at fair values are approximate of their fair values or the fair values could not otherwise be reliably measured:

	December	31, 2022	December 31, 2021			
	Carrying Amount	Fair Value	Carrying Amount	Fair Value		
Financial assets Investments in debt instruments measured at amortized cost	\$ 213,901,918	\$ 205,229,349	\$ 159,319,588	\$ 159,375,166		
Financial liabilities Bank debentures	65,244,424	65,097,666	82,091,512	82,882,006		

	December 31, 2022							
		Total		Level 1		Level 2	I	Level 3
Financial assets Investments in debt instruments measured at amortized cost	\$	205,229,349	\$	19,211,561	\$	186,017,788	\$	-
Financial liabilities								
Bank debentures		65,097,666		-		65,097,666		-
				Decembe	r 31,	2021		
		Total		Level 1		Level 2]	Level 3
Financial assets Investments in debt instruments measured at amortized cost	\$	159,375,166	\$	22,634,554	5	5 136,740,612	\$	_
Financial liabilities								
Bank debentures		82,882,006		-		82,882,006		-

40.1.3 The evaluation method and assumptions used in measuring fair value.

The fair value of financial assets and liabilities are determined as follows:

- (1) The fair value of financial assets with standard clauses and terms is quoted market price.
- (2) The fair value of financial instruments other than the above is determined by the discounted cash flow analysis or other generally accepted pricing models.
- 40.2 Fair value information financial instrument measured at fair value under repetitive basis

40.2.1 Fair value level

Information of the financial instruments measured at fair value categorized by level is as follows:

Financial Instruments	December 31, 2022								
Measured at Fair Value	Total	Level 1	Level 2	Level 3					
Non-derivative financial instruments									
Assets Financial assets measured at FVTPL Financial assets mandatorily classified as at FVTPL Shares Bonds Beneficiary certificates Financial assets measured at FVTOCI Equity instruments Debt instruments	\$ 565,856 3,621,989 251,237 22,073,286 <u>378,710,488</u> <u>\$ 405,222,856</u>	\$ 517,630 3,621,989 251,237 19,182,219 <u>185,720,588</u> <u>\$ 209,293,663</u>	\$ 48,226 - - - - - - - - - - - - - - - - - -	\$ - - - - - - - - - - - - - - - - - - -

There were no transfers of financial instruments between Level 1 and Level 2 fair value measurement for the year ended December 31, 2022 and 2021.

40.2.2 Reconciliation of Level 3 fair value measurement

For the Year Ended December 31, 2022

		Amount of Valua	ation Gain or Loss	Add	ition	Redu	ction		
Item	Beginning Balance	Included in Profit or Loss	Included in Other Comprehensive Income	Buy or Issue	Transferred In	Sell Out, Disposal or Settlement	Transferred Out from Third Level	Exchange	Ending Balance
Assets									
Financial assets measured at FVTOCI	\$ 2,935,949	\$-	\$ 778,783	\$ 497,085	\$ -	\$ (896,769)	\$ (373,253)	\$ (39,406)	\$ 2,902,389

For the Year Ended December 31, 2021

		Amount of Valua	ation Gain or Loss	Add	ition	Redu	ction		
Item	Beginning Balance	Included in Profit or Loss	Included in Other Comprehensive Income	Buy or Issue	Transferred In	Sell Out, Disposal or Settlement	Transferred Out from Third Level	Exchange	Ending Balance
Assets Financial assets measured at FVTPL Financial assets mandatorily classified as at FVTPL Financial assets measured at FVTOCI Liabilities	\$ 487,597 1,940,585		\$ - 248,958	\$- 756,599	\$-	\$ (139,648) (8,094)	\$ - -	\$ (2,099)	\$ - 2,935,949
Financial liabilities measured at FVTPL Held-for-trading financial liabilities	67,068	(67,068)	-	-	-	-	-	-	-

Some of the Group's investments became listed during the years ended December 31, 2022 and 2021. After the assessment, the market's fair values are available for reference. Therefore, such financial assets have been transferred from Level 3 to Level 1.

40.2.3 Valuation techniques and inputs applied for Level 2 fair value measurement

Financial Instruments	Valuation Techniques and Inputs
Bonds	Valuation was based on observable market prices or assessed by using cash flow method through observable elements.
Derivatives	Valuation was based on widely-adapted pricing techniques. The inputs were assessed by observable elements in the market.
Others	Valuation was based on observable market prices or assessed by using cash flow method through observable elements.

40.2.4 Valuation techniques and inputs applied for Level 3 fair value measurement

The fair value of financial assets classified as Level 3 included but was not limited to bond

investments measured at FVTPL, and investments in bonds and equity securities measured at FVTOCI.

Most financial instruments with fair value measurements classified as Level 3 only possess single, unobservable inputs. Non-active market debt instruments possess unobservable inputs. The non-active market equity instruments are independent and thus, are irrelevant to each other. The quantified information of significant unobservable inputs is as follows:

	Fair Value December 31, 2022	Valuation Techniques	Significant Unobservable Inputs	Interval (Weighted-Average)	Notes
Financial assets measured at FVTOCI					
Shares	2,891,067	1. Market approach	Market liquidity reduction	10%-19%	1. The higher of the liquidity reduction, and the lower of the fair value.
		2. Net asset value method	Market liquidity reduction	10%-19%	2. The higher of the liquidity reduction, and the lower of the fair value
Bonds	11,322	1.Counterparty quote 2.Discounted cash flow method	Discount rate	0%-10%	The higher of the discount rate, and the lower of the fair value.

40.2.5 Sensitivity analysis of alternative assumptions of Level 3 fair value measurements

The Group reasonably measured the fair values of its financial instruments; however, using different valuation models, evaluation methods and underlying assumptions may lead to different results. For financial instruments classified as having Level 3 fair value measurements, if the parameters were to go up 1%, the influence on net income or other comprehensive income would be as follows:

December 31, 2022

	Changes in Fair Value Reflected in Profit or Loss				Changes in Fair Value Reflected in Other Comprehensive Income				
	Favo	rable	Unfavorable		Favorable		Unfavorable		
Assets									
Financial assets measured at FVTOCI	\$	-	\$	-	\$	-	\$	(20,692)	

December 31, 2021

	0	Value Reflected in or Loss	Changes in Fair Value Reflected in Other Comprehensive Income				
	Favorable	Unfavorable	Favorable	Unfavorable			
Assets							
Financial assets measured at FVTOCI	\$ -	\$ -	\$-	\$ (20,719)			

For financial instruments classified as having Level 3 fair value measurements, if the parameters were to go down 1%, the influence of net income or other comprehensive income would be as follows:

December 31, 2022

	Changes in Fair Value Reflected in Profit or Loss				Changes in Fair Value Reflected in Other Comprehensive Income			
	Favora	able	Unfav	orable	F	avorable	Unfav	orable
Assets								
Financial assets measured at FVTOCI	\$	-	\$	-	\$	20,692	\$	-

December 31, 2021

	0	· Value Reflected in t or Loss	Changes in Fair Value Reflected in Other Comprehensive Income				
	Favorable	Unfavorable	Favorable	Unfavorable			
Assets							
Financial assets measured at FVTOCI	\$ -	\$ -	\$ 20,719	\$ -			

40.3 Financial risk management

40.3.1 Risk management

The Group's objective in risk management is to establish a risk control mechanism weighing the entire risk of the Group, restrictions from laws and regulations, to diversify, transfer, and avoid risk, and to pursue the maximum benefits of the Group's customers, shareholders, and employees. The Group's major risks include credit risk, market risk (interest rate, exchange rate and equity securities), operational risk, liquidity risk and so on.

The Group established written risk management policies and procedures that are considered and approved by the board of directors to identify, measure, monitor, and control the credit risk, market risk, operation risk and liquidity risk.

The Group's risk management department performs the Group's risk management activities pursuant to the policies approved by the board of directors. Risk management department works with other business departments in order to identify, evaluate, and avoid any financial risks. The board of directors formulates the written policies for risk management; the policy included specific exposures such as currency risk, interest rate risk, credit risk, derivative and non-derivative financial instruments. In addition, the department of internal audit is responsible for independent review of risk management and control environment.

40.3.2 Credit risks

Credit risk is the risk of counterparties' failure to fulfill their contractual obligations causing the Group's financial losses. Both in-balance-sheet and off-balance-sheet items are exposed to credit risks. For the Group's credit exposures, in-balance-sheet items mainly consisted of discounts and loans, credit card business, due from and call loans to banks, debt investments, and derivative instruments. Off-balance sheet items mainly consisted of financial guarantee, acceptances, letters of credit, loan commitments, and other services which also generate credit exposure.

To ensure that the credit risk is controlled within a tolerable range, the Group established an internal standard for credit risk. In that standard, all transactions are analyzed whether in the banking book or in the trading book, and either in-balance-sheet or off-balance-sheet, to identify the inherent and potential risks. The Group examines and confirms credit risk in accordance with the rules before launching new products and business. Furthermore, the Group also establishes a risk management system for complicated credit business such as factoring, credit derivative financial instruments and so on.

The Group's foreign operation units adopt policies and standards same as above to assess their asset quality and provision for contingent loss, and also include policies that comply with the regulations of the local financial supervisory commission.

(1) Procedures of credit risk management

The major procedures and methods for credit risk management are as follows:

A Credit business (including loan commitments and guarantees)

The Bank

a. The credit risk has increased significantly since initial recognition

The Bank assesses the change in the risk of default over the expected duration of each type of credit asset on each reporting date in order to determine whether the credit risk has increased significantly since initial recognition. For this assessment, the Bank's considerations (including forward-looking information) show that the credit risk has increased significantly since initial recognition and can be corroborated. The main considerations include:

- i. Changes in internal and external credit ratings from the significant increase in credit risk.
- ii. Information of overdue status (e.g. if the payment is overdue for more than 30 days).
- iii. Unfavorable changes in current or projected operating, financial or economic conditions that are expected to result in significant changes in the ability of the debtor to perform its debt obligations.
- iv. Significant changes in actual or expected results of the debtor's operations.
- v. The credit risk of other financial instruments of the same debtor has increased significantly.
- b. The definition of default and credit impairment on financial assets

The Bank's definition of default on financial assets is the same as the judgment of credit impairment on financial assets. If one or more of the following conditions are met, the Bank determines that the financial assets have defaulted and become credit impaired:

- i. Changes in internal and external credit ratings from the significant increase in credit risk.
- ii. Information of overdue status (e.g. if the payment is overdue for more than 90 days).
- iii. The debtor has become bankrupt or may file for bankruptcy or financial restructuring.
- iv. The debtor has died or been dissolved.
- v. Contracts of other debt instruments of the debtor have defaulted.
- vi. The active market of the financial assets disappeared due to financial difficulties.
- vii. The debtor's creditor gives the borrower a concession that would not have been considered due to economic or contractual reasons related to the debtor's financial difficulties.
- viii. There is a purchase or initiation of financial assets at a significant discount reflecting that credit losses have occurred.

The aforementioned default and credit impairment definitions apply to all financial assets held by the Bank and are consistent with the definitions used for the internal credit risk management purposes of the financial assets and are applied to the relevant impairment assessment model.

c. Measurement of expected credit loss

For the objective of assessing expected credit loss, credit assets are classified according to the credit risk characteristics (such as the purpose of the borrowing, the nature of the industry, the type of collateral and the state of the borrowing) into two categories: corporate finance and personal finance. Further to this, the credit risk characteristics are divided according to each category.

The 12-month expected credit loss amounts of the Bank's financial instruments whose credit risk has not significantly increased since initial recognition are used to measure the allowance for loss of the financial instruments; for financial instruments whose credit risk has increased significantly or which have had credit impairment since initial

recognition, such financial instruments are measured at the amount of full lifetime expected credit losses.

The estimation method and significant assumptions used to assess expected credit losses have not changed significantly since December 31, 2022.

d. Forward-looking information considerations

When measuring the expected credit losses, the Bank uses forward-looking economic factors that affect credit risk and takes such forward-looking information regarding expected credit losses into consideration. Based on professional economic judgment, the Bank uses statistical analysis results of GDP growth rate to provide forecast information of economic factors on a quarterly basis and re-evaluates such data on each financial reporting date.

SCB (HK)

a. The credit risk has increased significantly since initial recognition

SCB assesses the change in the risk of default in the next 12 months of each type of credit asset on each reporting date in order to determine whether the credit risk has increased significantly since initial recognition. For this assessment, SCB considerations (including forward-looking information) show that the credit risk has increased significantly since initial recognition and can be corroborated. The main considerations include:

- i. Changes in internal and external credit ratings and probability of default in the next 12 months.
- ii. Information of overdue status (e.g. if the payment is overdue for more than 30 days).
- iii. Unfavorable changes in current or projected operating, financial or economic conditions that are expected to result in significant changes in the ability of the debtor to perform its debt obligations.
- iv. Significant changes in actual or expected results of the debtor's operations.
- v. The credit risk of other financial instruments of the same debtor has increased significantly.
- vi. There is doubt about the collateral rights under the debt, or the collateral price is affected by the surrounding economic environment, and the mortgage value will decline due to economic recession.
- vii. There are unfavorable changes in the business of the debtor industry which are affected by the surrounding economy or policy.
- viii. Key person in debt companies have financial difficulties, debt or dispute litigation, or serious illness or death, all of which have a negative impact on the ability of debt companies to meet their debt obligations.
- b. The definition of default and credit impairment on financial assets

SCB's definition of default on financial assets is the same as the judgment of credit impairment on financial assets. If one or more of the following conditions are met, SCB determines that the financial assets have defaulted and have credit impairment:

i. Information of overdue status (e.g. if the payment is overdue for more than 90 days).

- ii. The debtor has become bankrupt or may file for bankruptcy or financial restructuring.
- iii. The debtor has died or been dissolved.
- iv. Contracts of other debt instruments of the debtor have defaulted.
- v. The active market of the financial assets disappeared due to financial difficulties.
- vi. The debtor's creditor gives the borrower a concession that would not have been considered due to economic or contractual reasons related to the debtor's financial difficulties.
- vii. The debtor's overall debt rises and is not proportional to its business growth.
- viii. If the debtor invests in a project or delays the construction of a project, the cost exceeds the budget, and the creditor needs to arrange for debt restructuring.
- ix. There is a purchase or initiation of financial assets at a significant discount reflecting that credit losses have occurred.
- x. Estimated debt contract payments failed to be fully recovered.

The aforementioned default and credit impairment definitions apply to all financial assets held by SCB and are consistent with the definitions used for the internal credit risk management purposes of the financial assets and are applied to the relevant impairment assessment model.

If the financial assets no longer meet the definition of default and credit impairment for six consecutive months, their statuses are judged to have returned to performance level and are no longer regarded as financial assets that have defaulted and have been credited.

c. Measurement of expected credit loss

For the objective of assessing expected credit loss, credit assets are classified according to the credit risk characteristics (such as the purpose of the borrowing, the nature of the industry, the type of collateral and the state of the borrowing) into two categories: Corporate finance and personal finance. Further to this, the credit risk characteristics are divided according to each category.

For financial instruments whose credit risk has not significantly increased since initial recognition, SCB measures the allowance for loss of the financial instruments based on the 12-month expected credit loss amounts; for financial instruments and operating lease receivables whose financial risk has significantly increased or which have had credit impairment since initial recognition, such instruments and operating lease receivables are measured at the amount of expected credit losses during the duration of the period.

The estimation method and significant assumptions used to assess expected credit losses have not changed significantly since December 31, 2022.

d. Forward-looking information considerations

When measuring the expected credit losses, SCB uses forward-looking economic factors that affect credit risk and takes such forward-looking information regarding expected credit losses into consideration. Based on professional economic judgment, SCB uses the statistical analysis results of GDP growth rate to provide forecast information of economic factors on a quarterly basis and re-evaluates such data on each financial reporting date.

B. Due from and call loans to bank

The Group assesses the credit position of counterparties and consults a credit rating agency for credit rating information and sets limits to the credit facilities.

C. Debt investments and derivative financial instruments

For the credit risk management of debt investments, the Group identifies credit risk by using information from external institutions about credit ratings, quality of debts, region, and the risk of counterparties.

Most of the Group's counterparties in derivative transactions are assessed at higher than investment grade, and the Group controls the investments according to counterparties' facilities (including call loans); counterparties that do not have credit ratings or are not assessed at investment grade are reviewed case by case. Counterparties which are non-financial or non-banking clients are assessed according to the general procedures for the approval of credit facilities and control of credit exposure situations of the counterparties.

- (2) Policies of credit risk hedging or mitigation
 - A. Collateral

The Group applies series of policies to decrease credit risks in its lending business. Among those policies is to request collateral from creditors. To secure the creditor's rights, the Group has established procedures for pledges, valuations, management, and disposals of collateral. The contracts between the Group and the borrowers clearly state the protocols, including but not limited to the security of credit, procedures for collateral and for offsets. To further decrease credit risks, the contracts also proclaim that the Group may decrease the credit facilities at its discretion, accelerate the maturity of the borrowings, demand immediate payback, or offset borrowers' assets in the Group against the borrowings.

B. Credit risk limitation and credit concentration management

The credit policies of the Group regulate the credit limitations, as applied to a single counterparty or group, to avoid excessive credit concentration. The Group further implements concentration policies, which monitor and manage the credit limitation and concentration in one single counterparty, different enterprises, related parties, industries, and countries. The policies are based on individual criteria in different categories including but not limited to industries, enterprises, and share-pledge related loans.

C. Other mechanisms for credit risk management

The contracts between the Group and the borrowers clearly state the protocols, including but not limited to the security of the credit, procedures for collateral and set off. To further decrease credit risks, the contracts also proclaim that the Group may decrease the balances, shorten the maturity period, demand immediate payback, or use borrowers' assets in the Group to offset their liabilities.

In most circumstances, the Group applies gross settlement with counterparties. However, to further decrease credit risks, the Group applies net settlement or even terminates transactions with certain counterparties when default may occur.

The table below analyzes the collateral held as security and other credit enhancements, and their financial effects in respect of the financial assets recognized in the Group's consolidated balance sheets:

December 31, 2022

				Maximum Exposure to Credit Risk Mitigated by

(3) Credit risk exposures

The maximum exposure of the Group's assets in the consolidated balance sheets is equivalent to the book value, while the pledged assets and other credit instruments are not considered. The off-balance sheet items related to the maximum credit exposure (without considering collateral or other credit enhancements and irrevocable maximum exposure) are as follows:

	Decemb	oer 31
	2022	2021
Guarantees	\$ 93,781,340	\$ 113,845,852
Issued and non-cancelable loan commitments	61,917,238	52,480,756
Issued but unused letters of credit	34,928,867	32,142,233
Non-cancelable credit card commitments	565,212	576,919

The Group assessed that it could continually control and minimize credit risk exposure of off-balance sheet items because it adopts stricter procedures and regularly audits credit accounts.

Total carrying amounts of the financial assets with the largest credit risk exposure in the Group are as follows:

				Decembe	r 31	1, 2022

(4) Information on concentration of credit risk

Concentration of credit risk exists if transaction counterparties are significantly concentrated on same individuals or groups engaged in activities with similar economic characteristics, which may lead their ability to fulfill contractual obligations being affected by similar changes in economic or other conditions.

Concentration of credit risk can be on assets, liabilities or off-balance sheet items and can arise in the course of the enforcement and implementation of transactions (regardless of products or service) or in the combination of exposures across categories, including credit, due from and call loans to banks, marketable securities, receivables and derivatives, etc. The Group maintains a diversified loan portfolio to mitigate the credit risk concentration to same customers; total discounts and loans transactions with same customers and non-performing loans are not material. The Group's most significant concentrations of credit risk of discounts and loans and non-performing loans by industry, region, and collateral were summarized as follows:

A. Industry

	December 31									
		2022								
Sector		Amount	%		Amount	%				
Private sector	\$	772,378,513	62	\$	710,332,622	63

(5) Information on credit risk quality

Part of the financial assets held by the Group, cash and cash equivalents, financial assets at fair value through profit or loss, investments in bills and bonds with resale agreements, guarantee deposits paid, security businesses, clearing and settlement funds, etc. are assessed to have very low credit risk because the counterparties have good credit ratings.

40.3.3 Market risk

(1) The sources and definition of market risk

Market risk is the risk resulting from changes in fair value and future cash flows of on- and off-balance-sheet financial instruments caused by changes in market prices, interest rates, foreign exchange rate, including equity securities price and commodity price. Changes in above risk elements can cause risks to shift the net profit of the Group or its investment structures.

The Group's financial instruments are exposed to price, interest rate and foreign exchange rate risks. Major market price risk positions of equity securities include domestic listed shares and funds. Major interest risks include bonds and interest rate derivative instruments such as fixed and floating interest rate swap and bond options whereas the major foreign exchange risks include foreign currency positions held by the Group.

(2) Market risk management policies

The Group monitors its market risk and tolerable loss according to the risk management objectives and limits approved by the board of directors.

The Group also builds a market risk information system, which enables the Group to effectively monitor the management of the investment limits, assessment of gains and losses, and analysis of sensitivity factors. The results of the monitoring, assessment and analysis are reported to the board of directors in risk control meetings and serve as references for the decision making of the management.

The Group splits market risk exposures into trading and held-for-fixed-income portfolios which are controlled by both the Group's operation and risk management section. Routine control reports are reviewed by the board of directors and relevant committees.

- (3) Market risk management process
 - A. Recognition and measurement

The Group's operation and risk management sections both identify market risk factors of exposure positions, which are used to measure market risks. Market risk factors include interest rates, foreign exchange rates and market price of equity securities, and exposures,

gains and losses and sensitivity (PV01, Delta, Beta) etc. Measurement of investment portfolio is affected by interest rate risk, foreign exchange risk and price of equity securities.

B. Monitoring and reporting

The Group's risk management department regularly reviews market risk management objective, positions and control of gains and losses, sensitivity analysis and pressure test and reports to the board of directors. Therefore, the board of directors could well understand market risk control. The Group has established explicit notification process, the limit and stop-loss regulation for various transactions. Stop-loss order must be taken when the limit is reached, otherwise the trading department's reasons and plans must be approved by the management, and the department should report to relevant committee regularly.

- (4) Interest rate risk management
 - A. Definition of interest rate risk

Interest rate risk represents risks of changes in fair value of investment portfolio and loss in earnings resulting from changes in interest rates. Major products include interest rate-related financial securities and derivative instruments.

B. Purpose of interest risk management

Interest rate risk management enhances the Group's ability to deal with a contingency, to measure, manage and avoid negative influence on earnings and economic values of balance sheet items affected by the changes in interest rates. In addition, it enhances the efficiency of capital and the business management.

C. Procedures of interest risk management

The Group carefully chooses investment target through conducting research about issuers' credit, financial status, country risks and interest rate trend. The Group also establishes trading amount limit and stop-loss limit including limit for trading department, trader and trading commodity, etc. which are approved by top management and the board of directors.

When the Group undertakes business activities related to interest rate commodities, it will identify interest rate reprising risks and yield curve risks, and measure the possible impact of interest rate changes on the Group's earnings and economic value. The Group reports the analysis and monitoring of limit on interest rate risk position and various interest rate management objectives to the strategy management committee and the board of directors on a monthly.

When risk management objective has exceeded its limit, it will be reported to the strategy management committee for resolution of response actions.

D. Measurement methods

The Group measures risks of price reset periods gap from difference in maturity date and price reset date of assets, liabilities, and off-balance sheet items, and regularly uses various hypothetical scenarios of yield curve changes to measure the possible impact of interest rate changes on earnings and economic value. The Group also established interest rate sensitivity monitoring index for major periods in order to maintain long-term profitability and business growth. Such interest rate indexes and results of pressure test are reviewed by management personnel regularly. In addition, the Group regularly uses DV01 to measure portfolio affected by interest rate.

(5) Foreign exchange rate risk management

A. Definition of foreign exchange rate risk

Foreign exchange risk means losses resulting from currencies exchange at different times. The Group's foreign exchange rate risk results mainly from spot and forward foreign exchange. The Group's foreign exchange rate risk is relatively insignificant due to the fact that transactions are basically settled immediately on transaction date.

B. Policies, procedures and measurement method for foreign exchange rate risk management

In order to control foreign exchange rate risk within tolerable range, the Group has established trading limit, stop-loss limit and maximum loss for trading department and trader and the risk is controlled within the tolerable range.

The Group undertakes pressure test on a seasonal basis and uses 3% fluctuation in major foreign exchange rate (USD) as the sensitivity threshold and reports test results to the board of directors.

- (6) Equity securities price risk management
 - A. Definition of equity securities price risk

The market risk of equity securities held by the Group includes individual and general risk from price fluctuations of both individual equity security and the entire equity security market.

B. Purpose of equity security price risk management

The main purpose of equity security price risk management is to prevent financial status from deteriorating and to avoid decrease in earnings due to violent fluctuation in equity security prices, and to enhance capital efficiency and strengthen operation.

C. Procedures of equity security price risk management

The Group regularly uses β value to measure the degree of influence on investment portfolio system risk. Stop-loss point is set according to the policy approved by the assets and liabilities management committee. Stop-loss action must be taken when limit is reached, otherwise the investment department must submit request to top management personnel for approval.

D. Measurement method

The Group's control of security price risk is based on risk values.

(7) Market valuation technique

The Group assesses its exposures to market risk and the anticipated loss under market pressures by using assumptions on changes in several market conditions. Limits of various financial instruments are set by the board of directors and monitored by its risk management department. The Group also establishes sensitivity analysis based on major risk factors of various financial products in order to monitor the changes in various market risk factors of financial products.

- A. Sensitivity analysis
 - a. Interest rate risk

The Group has assessed the possible impact on income if global yield curve moves between -1 to +1 basis points simultaneously on December 31, 2022 and 2021 while other factors remain unchanged.

b. Foreign exchange rate risk

The Group assesses the possible impact on income when exchange rates of the NTD against various currencies fluctuate between -1% and +1% on December 31, 2022 and 2021 while other factors remain unchanged.

The functional currency of SCB (HK) is the HKD, and the major foreign currency is the USD; as the two currencies were under the Linked Exchange Rate System, there was insignificant foreign exchange rate risk.

c. Equity securities price risk

The Group has assessed the possible impact on income when equity security prices on December 31, 2022 and 2021 rise or fall by 1% while other factors remain unchanged.

The analysis assumed that the trends of equity instruments are consistent with historical data.

December 31, 2022 Amount **Major Risk Fluctuation Range** Equity **Profit or Loss** 753,482 (41,383) Foreign currency appreciated 1% against NTD Foreign exchange risk (753, 482)41,383 Foreign currency depreciated 1% against NTD (77, 350)2,120 Interest rate curve edged up 1bp Interest rate risk 77,350 (2,120)Interest rate curve edged down 1bp 179,406 5.525 Equity price increased 1% Equity price risk (179,406)(5,525)Equity price decreased 1%

40.3.4 Liquidity risk

(1) The sources and definition of liquidity risk

Liquidity risk is the possibility that the Group is unable to liquidate assets or obtain financing to fulfill matured financial liabilities which may result in financial loss. Liquidity risk may be present when, for example, deposits are withdrawn in advance of the original date of settlement, the market becomes worse and borrowing from other banks becomes difficult, the clients' credit deteriorates leading to the occurrence of defaults, liquidation of financial instruments becomes difficult, early redemption of interest-sensitive instruments happens, etc. The aforementioned factors may reduce cash balance to be used in the areas of loans, trading, and investment. In some extreme circumstances, the lack of liquidity may lead to the decrease in the overall assets and liabilities, and the need to liquidate the Group's assets and the possibility of being unable to fulfill loan commitments. Liquidity risks include inherent risks that may be affected by some specific industry events or overall market condition. These events include but are not limited to credit, merger and acquisitions, systemic breakdown and natural disasters.

(2) The management policies are as follows:

The management procedures are monitored by the independent department of risk management;

the procedures are as follows:

- A. Regular financing and monitoring of cash flows to ensure the fulfillment of the requirements in the future.
- B. Maintaining appropriate position of high liquidity assets which are easily realizable.
- C. Monitoring of liquidity ratios of the balance sheet accounts according to the internal management purposes and external monitoring rules.
- D. Managing the maturity date of debt instruments.

The procedures for monitoring and reporting liquidity risk are applied and measured based on the estimated cash flows (the time gap is based on how the Group manages the liquidity risk) of 1 day, 10 days, and 1 month. Estimates of future cash flows are based on the maturity analysis of financial assets and liabilities. The risk management department also monitors the use of loan commitment, discount facilities, guarantee letters, and other types of contingent liabilities, and furthermore reports the related information to the risk management committee and the board of directors regularly.

The Group holds certain position of highly liquid interest-bearing assets to fulfill its obligation and for future needs. To manage the liquidity risk, the Group holds the following assets: Cash and cash equivalents, due from the Central Bank and banks, and financial assets at fair value through profit or loss, etc.

(3) Maturity analysis

The Group analyzed cash outflows of non-derivative financial liabilities according to the remaining terms from date of the balance sheets to maturity date of the contract. The disclosure of cash outflows of non-derivative financial liabilities is based on the cash flows of contracts so that the items could not correspond with all items in the consolidated balance sheets.

The Group evaluated the contractual maturity date to comprehend all derivative financial instruments on the consolidated balance sheets. Because the maturity analysis of derivative financial liabilities is based on the contractual cash flows, the amounts would not correspond with related items on the consolidated balance sheets. Maturity analysis of derivative financial liabilities is as follows:

A. Derivative financial liabilities in net settlement

40.3.5 Interest rate benchmarks

The financial instruments of the Group affected by the interest rate benchmarks include loans and discounts, financial assets and liabilities measured at FVTPL, financial assets measured at FVTOCI and financial assets measured at amortized cost. The linked indicator interest rate types are USD LIBOR. The Group prepared interest rate benchmark transition plan which comprises the following work streams: risk management, contract management, product management, taxation and accounting, and customer communication, etc. And the discussions have been started with financial instrument counterparties on how to amend the affected contracts, and it is expected that the amendment will be completed before the conversion of the interest rate benchmarks.

On December 31, 2022, the non-derivative financial instruments held by the Group that have been affected by the interest rate benchmark reform and have not yet converted to alternative interest rate indicators are summarized as follows:

Financial assets	Book value
Discount and loans, net	
USD LIBOR	\$ 92,469,052
SGD SOR	462,724
Total	92,931,776
Financial assets measured at FVOCI	
USD LIBOR	12,971,793
Total	\$ 105,903,569

Financial liabilities	Boo	ok value
Due to the central bank and other banks		
USD LIBOR	¢	3 471

On December 31, 2022, the derivative financial instruments held by the Group that have been affected by the interest rate benchmark reform are summarized as follows:

	Nomin	al in currency	Book value Financial liabilities		
Derivatives linked to USD LIBOR Interest rate swap	\$	2,601,480	\$	176,821	

40.4 Transfer of financial assets

In the daily transactions of the Group, most of the transferred financial assets not eligible for full derecognition are repurchase notes and bonds. The cash flows of the transactions have been transferred to outsiders and the liabilities for repurchasing the transferred financial assets in a fixed amount have been recognized; the Group may repurchase the transferred financial assets in the future. The Group is not eligible to conduct, sell, or pledge the transferred financial assets during the effective period prior to derecognition. However, the Group is still exposed to the interest risks and credit risks. As a result, the transferred financial assets that do not qualified for derecognition and related financial liabilities.

41. AVERAGE AMOUNT AND AVERAGE INTEREST RATE OF INTEREST-EARNING ASSETS AND INTEREST-BEARING LIABILITIES

Average amount and average interest rate of interest-earning assets and interest-bearing liabilities that were affected by interest rate fluctuations are as follows:

Average balances were calculated by the daily average balances of interest-earning assets and interest-bearing liabilities.

41.1 The Bank

	For the Year Ende 31, 202	
	Average Balance	Average Rate (%)
Interest-bearing assets		
Cash and cash equivalents - due from other banks	\$ 28,307,552	0.14
Due from the Central Bank and call loans to banks	118,280,029	1.43

42. CAPITAL MANAGEMENT

All the Group's risks were included in the scope of assessment of capital adequacy according to "Regulations Governing the Capital Adequacy". The business objectives and project budget are approved by the board of directors, and furthermore the Bank considered the development strategy, capital adequacy, debt ratio, and dividend policy in its assessments. The contents are included in stress test, estimate of capital adequacy ratio to ensure achieving the objective of capital adequacy and strengthening of the capital structure.

The Banking Act and related measures stipulate that in order to improve the financial foundation of a bank, the ratio of the Group's own capital to the risky assets shall not be less than 10.50%, where the actual ratio is lower than the prescribed standard, the authorities may impose limit on its capital surplus distribution.

The Group conformed to the regulation on capital management as of December 31, 2022 and 2021.

The following table lists the equity capital, risk-weighted assets, and risk exposure:

	December 31		
	2022	2021	
Analysis items			
Eligible capital			
Common equity	\$ 188,857,653	\$ 170,375,493	
Other Tier I capital	8,070,000	6,470,659	
Tier II capital	42,150,235	51,378,379	
Eligible capital	<u>\$ 239,077,888</u>	<u>\$ 228,224,531</u>	
Risk-weighted assets			
Credit risk			
Standardized approach	\$ 1,405,441,150	\$ 1,325,138,207	
Credit valuation adjustment (CVA)	590,331	751,052	
Internal rating based approach	N/A	N/A	
Synthetic securitization	493,720	1,072,451	
Operational risk			
Basic indicator approach	70,041,661	68,453,256	
Standardized approach/ alternative standardized approach	N/A	N/A	
Advanced measurement approach	N/A	N/A	
Market risk			
Standardized approach	60,564,114	90,991,498	
Internal models approach	N/A	N/A	
Total risk-weighted assets	<u>\$ 1,537,130,976</u>	<u>\$ 1,486,406,464</u>	
Capital adequacy ratio	15.55%	15.35%	
Ratio of common equity to risk-weighted assets	12.29%	11.46%	
Ratio of Tier I capital to risk-weighted assets	12.81%	11.90%	
Leverage ratio	7.95%	7.72%	

Note 1: Eligible capital and risk-weighted assets are calculated under the "Regulations Governing the Capital Adequacy Ratio of Banks" and "Explanation of Methods for Calculating the Eligible Capital and Risk-weighted Assets of Banks".

- Note 2: Formulas used were as follows:
 - (1) Eligible capital = Ordinary equity + Other Tier I capital + Tier II capital.
 - (2) Total risk-weighted assets = Risk-weighted assets for credit risk + Capital requirements for operational risk and market risk \times 12.5.
 - (3) Capital adequacy ratio = Eligible capital ÷ Total risk-weighted assets.
 - (4) Ratio of ordinary equity to risk-weighted assets = Ordinary equity \div Total risk-weighted assets.
 - (5) Ratio of Tier I capital to risk-weighted assets = (Ordinary equity + Other Tier I capital) ÷ Total risk-weighted assets.
 - (6) Leverage ratio = Net value of tier I capital \div Net value of exposure measurement

43. ASSET QUALITY, CONCENTRATION OF CREDIT EXTENSIONS, INTEREST RATE SENSITIVITY, PROFITABILITY AND MATURITY ANALYSIS OF ASSETS AND LIABILITIES

- Note 1: The top 10 credit extensions ranking is made by total credit balance, which excluded government-owned or state-run enterprises. If the borrower is an affiliate of the Group enterprise, the credit balance of the borrower is then aggregated to the Group enterprise's credit balance. The borrower is marked by specific codes as well as its major industry. The major industry of a borrower is determined by its maximum exposures by industries. The classification of industry should be in line with the Standard Industrial Classification System of the Republic of China published by the Directorate General of Budget, Accounting and Statistics under the Executive Yuan.
- Note 2: "Group Enterprise" conforms to the definition of Article 6 in "Supplementary Provisions to the Taiwan Stock Exchange Corporation Rules for Review of Securities Listings."
- Note 3: Credit balance includes each item of loan (including import bill negotiated, export bill negotiated, discounts, overdrafts, short-term loans, short-term secured loans, marginal receivables, medium-term loans, medium-term secured loans, long-term loans, long-term secured loans and non-performing loans), exchange bills negotiated, accounts receivable without recourse factoring, acceptances receivable and guarantees issued.
- Note 4: It is net equity of SCB (HK).

46. OTHERS

Facing the global pandemic of corona virus pneumonia and its recent impact in my country, the Bank's business strategies always follow the stable and practical core values. Despite of the global economic turmoil, the Bank still maintained a steady growth of capital. The annual consolidated financial statements included relevant material information.

47. ADDITIONAL DISCLOSURES

- 47.1 Information of significant transaction items and 47.2 Other business investment is as follows:
 - 47.1.1 Financing provided: Table 2.
 - 47.1.2 Endorsement/guarantee provided: The Bank not applicable; investees not applicable or none.
 - 47.1.3 Marketable securities held: Table 3.
 - 47.1.4 Marketable securities (for investees) or investee investment (for the Bank) acquired and disposed of, at costs or prices of at least NT\$300 million or 10% of the issued capital: Table 4.
 - 47.1.5 Acquisition of individual real estate at costs of at least \$300 million or 10% of the issued capital: None.
 - 47.1.6 Disposal of individual real estate at prices of at least \$300 million or 10% of the issued capital: Table 5.
 - 47.1.7 Allowance for service fees to related-parties amounting to more than \$5 million: None.
 - 47.1.8 Receivables from related parties amounting to at least \$300 million or 10% of the issued capital: None.
 - 47.1.9 Sale of non-performing loans: Table 6.

- 47.1.10 Application for approval of securitization product types and information according to Financial Asset Securitization Clause of the Real State Securitization Act: None.
- 47.1.11 Other significant transactions which may have effects on decision making of financial statement users: None.
- 47.1.12 Names, locations, and other information of investees on which the Bank exercises significant influence: Table 7.
- 47.1.13 Derivative financial transactions: Note 8 on which the Bank exercises significant influence has no such transactions.
- 47.3 Investments in Mainland China:
 - 47.3.1 Name of the investees in Mainland China, main businesses and products, paid-in capital, method of investment, information on inflow or outflow of capital, percentage of ownership, investment income or loss, ending balance of investment, dividends remitted by the investee, and the limit of investment in Mainland China: Table 8.
- 47.3.2 Significant direct or indirect transactions with the investees, prices and terms of payment, unrealized gain or loss: None.
- 47.4 Significant transactions and the amount among the parent and its subsidiaries: Table 9.
- 47.5 Information of major shareholders:

list all shareholders with ownership of 5% or greater showing the name of the shareholder, the number of shares owned, and percentage of ownership of each shareholder: None.

48. SEGMENT INFORMATION

Information reported to the chief operating decision maker focuses on the major geographical areas and profit or loss of the segments. The Group's segments mainly operate in Taiwan and Hong Kong.

The Group provides income before tax of each operating segment to the chief operating decision maker as the basis of resource allocation and assessment of segment performance.

The significant accounting policies of each operating segment are in line with the Group's significant accounting policies stated in Note 4.

The operating segments information is as follows:

	For the Year Ended December 31, 2022

Accounts receivable factored	without recourse (Note 7)		-	451,234	-	4,512	-	-	567,807	-	5,678	-

Note 1: Overdue loans represent the amounts of overdue loans reported to the authorities and disclosed to the public, as required by the "Regulations Governing the Procedures for Banking Institutions to Evaluate Assets and Deal with Non-performing/Non-accrued Loans." Overdue credit card receivables represent the amounts of overdue receivables reported to the authorities and disclosed to the public, as required by the Banking Bureau's letter dated July 6, 2005 (Ref. No. 0944000378).

Note 2: Ratio of NPL: Non-performing loans ÷ Outstanding loan balance. Ratio of delinquency: Non-performing receivables ÷ Outstanding receivables balance.

Coverage ratio of loans: Allowance for possible losses on loans ÷ Non-performing loans. Note 3: Coverage ratio of receivables: Allowance for possible losses on receivables - Non-performing receivables.

Mortgage is fully secured by property, which is purchased (owned) by the borrower, the spouse or the minor children of the borrower and the rights on mortgage are pledged to the financial institution, for the purpose of purchasing or decorating property. Note 4:

Microcredit, as categorized in accordance with the Banking Bureau's letter dated December 19, 2005 (Ref. No. 09440010950), are unsecured loans with small amounts exclusive of credit cards and cash cards. Note 5:

Other loans of consumer banking refer to secured or unsecured loans exclusive of mortgage, cash card, microcredit and credit card. Note 6:

Note 7: As required by the Banking Bureau's letter dated July 19, 2005 (Ref. No. 0945000494), factoring without recourse is disclosed as non-performing receivables in three months after the factors or insurance companies reject indemnification.

- Note 1: The parent company and subsidiaries are indicated by the following numbers:
 - (1) Parent company: 0.
 - (2) Subsidiaries: 1 onward.
- Note 2: The directional flow of the various transactions are indicated according to the following types:
 - (1) Transactions from parent company to subsidiary.
 - (2) Transactions from subsidiary to parent company.
 - (3) Transactions from subsidiary to subsidiary.
 - (4) Transactions from parent company to indirect subsidiary.
 - (5) Transactions from indirect subsidiary to parent company.
- Note 3: The percentages are recalculated by the consolidated total assets or the consolidated net sales. If the account belongs to the balance sheets, it will be based on the percentage of its final amount divided by the consolidated total assets. Otherwise, if the account belongs to the income statements, it will be based on the percentage of its average amount divided by the consolidated net revenue.
- Note 4: All transactions with related parties were carried out at arm's length.
